2. The extent of Mercantile-1 and Mercantile-2 uses permissible in a Building-unit and Zones shall be regulated according to the width of the road on which it abuts as under

No.	Road Width	Floors on which Mercantile Use is Permissible
1	9 mts and less than 12 mts	Ground Floor Only
2	12 mts and less than 18 mts	Ground and First Floor Only
3	18 mts and Above	All Floors

3. All permissible non-residential Dwelling-1 and non-Dwelling-2 uses in Residential-1 and Residential-2 zones may be permitted on the ground floor or any other floor in a residential dwelling if provided with separate means of access/entrance.
4. Apart of residential-Dwelling-1 and Dwelling-2 building may be permitted for use as office in case of professional requirements. This is subject to a maximum 150 sq.mts and parking for this purpose shall be provided.

12.1.2 Permissible Uses by Area of the Building-unit

No.	Building Use	Area of Building unit
1	Religious	Minimum 500 sq.mts
2	Fuelling Station without Service Station	Minimum 1000 sq.mts

General Development Control Regulations

No.	Building Use	Area of Building unit
3	Hospitality	Minimum 7000 sq.mts
4	Education-2, Hospitality, Fueling Station with Service Station	Minimum 2000 sq.mts
5	Education-2, Assembly, 2,Innards	Minimum 3500 sq.mts
6	High rise building	Minimum 1500 sq.mts

12.2 Regulations based on Area of Building-unit

12.2.1 Area and Dimension of a Building-unit

1. Minimum area of a Building-unit shall be 10000 sq.mts.
2. No side of the Building-unit shall be less than 45mts.
3. The above condition of the ratio is not applicable if the smallest side of the Building-unit is 0.5mts or more as length.

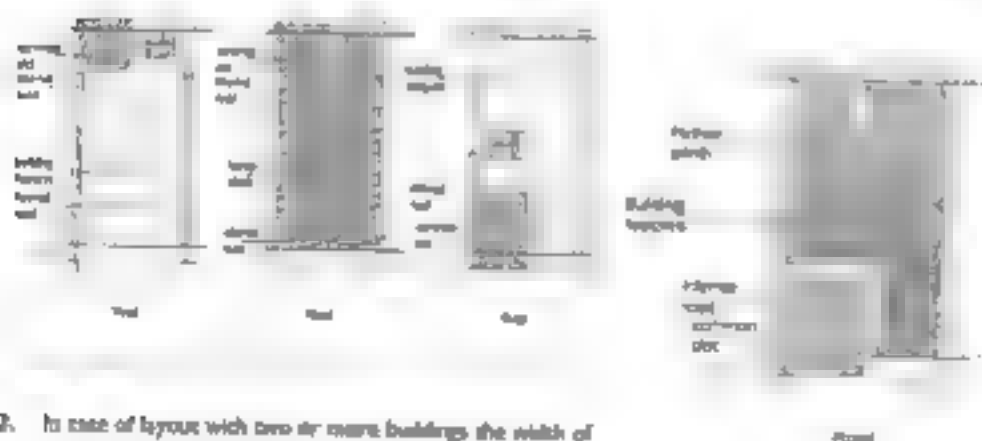

Note: The layout schemes which are sanctioned before formation of SVA/DA shall have to be grouped. The plot having minimum Building-unit area of 40 sq.mts in VVA scheme LP scheme and 50 to 90 sq.mts, in case of SVA/DA area which are sanctioned in layout stage in the modification regarding the SVA/DA Q/C/R/Developments Plan, shall have the rear side margin relaxation of minimum 1.5 mts. Any scheme after sanction of SVA/DA will have to follow published DCRs.

12.3 Development of Land

12.3.1 Internal Road and Approach to Building and Common Plot

1. Internal road width shall be measured from its up to the next wider road or meeting.
2. In case of single building the width of approach internal road shall be measured based on the distance from the TP or DP road up to the edge of the building in case of hollow pinch, or location of the furthest entrance of a building in case of solid pinch.

In case of buildings connected internally or externally the length of internal road shall be considered up to the edge of the hollow pinch of the furthest building (in case of building with hollow pinch) and up to the location of the furthest entrance of the building in case of solid pinch.

2. In case of layout with two or more buildings the width of Internal Road on which the building abuts shall be as applicable for a length of above 45m category. In case of more than two buildings, approach of as applicable width shall be allowed as per table 12.3 x.4

4. The width of the Internal or Approach Road shall be based on the length and use of the Building as under:

No.	Length of Road (meters)	Width of road for Residential Dwelling-1 and Dwelling-2 Use (meters)	Width of road for Non-Residential Dwelling Use (meters)
1	Up to 150mts	7.5	9.0
2	Above 150mts and up to 300mts	9.0	10
3	Above 300mts	12.0	18.0

Formatted Table

Note: If margin required is bigger than width of Approach Road or Internal Road whichever is higher shall be applicable.

23.2 General Requirements for Internal Roads

The Internal Road shall be provided up to each individual building.

- Internal road width shall be measured in length from the furthest point of its origin to the next wider road it meets.
- In cases where the road is in continuation with any private road in the adjoining estate or any public road continuous to the estate, the length of the adjoining road or the public road shall be added to the length of the internal road for the purpose of determining the width of such road.
- Curves at the junctions:** The curves shall be provided at the junction of roads as prescribed below:

No.	Width of the road in meters	Radius of road curvature (meters)
1	7.5 or less	Half the width of wider road
2	More than 7.5 and up to 10	Half the width of wider road
3	More than 10 up to 30 m	Half the width of wider road
4	More than 30 m	Half the width of wider road

Note: The width of the wider road shall be taken into consideration in determining the radius of the curvature at the junction of roads of different widths.

- The shape of the plots and the junction of the roads at the corners shall be designed as directed by the Competent Authority.
- The alignment of the internal road or roads shall be regulated to be in continuation of the public or private roads continuous to the applicant's Building Unit, but in case of termination of an internal road or roads, a turning circle with diameter of 12.5mts or 12mts x 6 mts turning "T" shall be required at the cut-de-sac. This requirement may be waived for such road with width of 7.5mts if the length does not exceed 100 mts.
- The Development Permission shall be regulated as per the proposed road network by the competent authority.

General Development Control Regulations

2.3.3 Amalgamation and Subdivision of Building-unit

The owner or developer shall be required to get the land reassessed by the Competent Authority as 'Building-unit' or 'Building-units' before amalgamation or subdivision of the land. Development Permission shall not be granted without fulfilment of that requirement.

2.3.4 Amalgamation and Subdivision of Building-unit with Existing Structures

In the case of Building-units with existing buildings, its sub-division or amalgamation shall not be approved unless it fulfils all the requirements under these Regulations.

2.3.5 Layout for Amalgamation and for Subdivision of Building-unit

1. In case of subdivision or amalgamation, the depth of Building-unit shall not exceed twice the width of the proposed Building-unit fronting on the road. However, this condition of ratio will not be applicable if the length of the smaller side of the subdivided Building-unit is equal or more than 0.50mts.
2. Amalgamation of Building-unit abutting on a road with width equal or more than 18.00 mts, shall be permitted if depth of the Building-unit shall not exceed three times the frontage of the Building-unit abutting on road.
3. No side of the sub-divided plot shall be less than 9mts.
4. Building units with area of 100 sq.mts shall be permitted on road width of 9mts or 10mts.

**2.3.6 Contribution of Land for any development in Non-TP Areas**

For development in confirmation with zoning, where the Town Planning Scheme is not declared except Agriculture Zone, the Competent Authority shall enforce owners/applicant to contribute land amounting up to 40% in aggregate of its plot/building-unit to the Competent Authority for providing roads, public purpose and multipurpose activities.

2. The competent authority shall plan for proper access, circulation and mobility in the area, prepare a road network plan, which shall synchronize with any existing road or development plan.
3. The shares contributed land shall be adjusted by preparing TPS.
4. The use of Public Purpose Land shall be applicable irrespective of the zones or road width.

2.3.7 Development on kabrastan, burial ground etc.

The land occupied by the graveyards, kabrastans, burial grounds, crematoriums and allied actions in the Development Plan shall be kept permanently open. Competent Authority may permit structures to be built for specific purpose.

2.3.8 Development on Open Space Plots

20% of the area of the "Open Space Plots" provided under TP Schemes may be utilized for the construction with required margins for the common/recreational/community uses. Such construction shall be permitted with basement, ground floor or a floor on hollow plinth.

2. In case the building is on hollow plinth, in addition to the stair cabins and ramps, 5% of the total permissible built-up area of this plot shall be allowed to be built-upon for the construction for store room, security cabins, toilet etc. at the ground level. The rest of the "Open Space Plot" shall be left to open to sky.

General Development Control Regulations

12.4 Floor Space Index (FSI)**(2.4.1 Permissible Floor Space Index (FSI))**

The maximum permissible FSI shall be regulated as per Planning Regulation No 9.1

2. Area covered by Attium and mezzanine floors shall be counted towards computation of FSI.

2.4.2 Relaxation in Floor Space Index (FSI)

As per Planning Regulation No.8.4.5

12.4.3 Areas not counted towards computation of FSI:

1. Hollow Plinth: Spaces of hollow plinth provided for the purpose of parking with maximum height of 3.5mts and a minimum height of 3.0mts from finished ground level to finished first floor level.
2. Hollow Plinth can have provision for electric meter room, room for telephone distribution board, bathroom, water room, terrace room, and security cabin and entrance foyer if the total area does not exceed 5sqm. This area shall not be considered towards computation of FSI.
3. All exterior open to sky spaces, utility ducts in any form, shape and size required either by design or Regulations. However, an atrium shall be counted towards the computation of FSI.
4. Open-to-sky space of common plot is not counted towards FSI.

5. Loft provided as per Performance Regulation No. 9 D up to a maximum of 30% of the enclosing space.
6. Basement exclusively used for parking. Such basement shall have minimum height of 2.0mts and maximum height of 2.8mts, measured from finished basement floor level to finished upper/plinth level. Only in case of mechanised parking, there is no restriction of maximum height or number of basement floors used for parking purpose.
7. In any marginal open space- weather sheds, sun breakers and horizontal or vertical projections shall be permitted up to 60mts. These projections may also be part of the facade articulation, but shall in no cases become a part of the habitable space.

General Development Control Regulations

8. Staircase, Stair Cabin provided as per Performance Regulation 20.0.
- a. Staircase with maximum intermediate landing width equal to the width of stair including the wall.
 - b. Maximum landing width at floor level shall be three times the width of stair (x mts) including additional space (0.5x mts) at either side of the staircase provided as common area.
 - c. Staircase provided within an individual dwelling unit in an apartment building, shall be included in computation of FSI.
9. Lift, lift well with lift cabin, lift landing of lift well and water tank including the walls provided as per Performance Regulation 20.0.
- a. The width of the lift landing shall be considered equal to the maximum width of the lift well including walls (x mts) with an additional space (0.5x mts) at either side of the lift provided as common area (illustrated across).
 - b. The depth of the lift landing shall be two times the maximum width of the lift well including walls (x mts).
10. Vehicular ramps and pedestrian ramps provided as per Performance Regulation No. 9.1-5.
11. Skip Floor and Refuge area provided for fire safety as per Performance Regulation No. 24.0. Skip floor shall have a maximum clear floor height of 2.1mts and shall not be enclosed with walls. Skip floor may be used for service area such as provision of air-handling units, etc. Refuge area shall be provided as per National Building Code (NBC).
12. Electrical Sub-station, Transformer room, Box-type transformer, Section Feeder Pillar, Auxiliary Power Back-up System and meter room according to the norms of the Competent Electric Company.
13. Area provided and used for parking at any floor level.
14. Open-roofed space used for solar water heating system, outdoor units for air-conditioners or mechanical ventilation shall be exempt from FSI.

12.1 Building Height

12.1.1 Maximum Permissible Height

The Maximum Permissible Building Height shall be as per provisions of Planning Regulation No.8.4.5 and regulated according to the width of the road on which it abuts as prescribed below:

No.	Road Width (in meters)	Maximum Permissible Building Height (in meters)
1	Less than 7 mts	02.5
2	7.0 mts and less than 10 mts	15.5
3	10.0 mts and above	40-50

General Development Control Regulations

12.6 Margins

12.6.1 Road Side Margins for Residential-Dwelling-1 and Dwelling-2 and Non-Residential Dwelling Uses (Except Industrial and Special Buildings)

No.	Road Width (in meters)	Road Side Margin for Building-unit margin for low rise	Margins for high rise	Formatted Table
1	Up to 9	3-0-2.5	High rise not permitted	Formatted Table
2	Above 9 and up to 12	4-5-3		
3	Above 12 and up to 18	4-0-4.5		
4	Above 18 and up to 30	4-0-4.5	6.0 -	Formatted Table
5	Above 30 and up to 60	6.0	9.0	
6	Above 60	9.0	9.0	

Road Side Margin in a Building-unit shall be regulated by the Road width it abuts on as mentioned in the table above.

2. For Building-units with two or more abutting roads, the Road-side margin shall be applicable on all such abutting sides as illustrated below:

3. Build-to-line

1. The Build-to-line shall be considered as the boundary line formed after leaving the Road Side margin and the required side margins.

12.6.2 Minimum Road Side Margin for Industrial Use

The Road Side Margin for Industrial use shall be regulated by the Road width it abuts on as mentioned in the table below:

No.	Width of Road (meters)	Road Side Margins (in meters)
1	Up to 12mts	No side margin
2	Above 12mts and up to 18 mts	6.0
3	Above 18mts and up to 30mts	7.5
4	Above 30.0mts and more	9.0

General Development Control Regulations

12.3 Side and Rear Margins

The minimum Side and Rear (all other than Road side) Margins in a Building-unit shall be regulated on the basis of the area and proposed height of the Building as indicated in the tables Regulation No. 12.4.5. These are not applicable for Special Buildings.

12.4 Minimum Side and Rear Margins for Building-units up to 500sq.m for Residential Zones

1. Required Side and Rear Margins

Area of the Building-Unit	Building Use	Required Rear Margins	Required Side Margins
Up to 50 sq.m	Detached & Semi detached dwellings, tenement	2.25 mts	Not Required
	Flats, Apartments, Hostel		1.5 mts
Above 50 sq.m & up to 300 sq.m	Detached & Semi detached dwellings, tenement	2.25 mts	3 any one side
	Flats, Apartments, Hostel		1.5 mts
Above 300 sq.m & up to 500 sq.m	Detached & Semi detached dwellings, tenement	2.25 mts	3.0 mts
	Flats, Apartments, Hostel		

Area of the Building-Unit		Required Rear Margins	Required Side Margins
Up to 50	Low rise	2.5	0.0
	High rise	3.0	3.0
120 to 300	Low rise	3.0	2.5 any one side
	High rise	3.0	3.0 all side
300 to 500	Low rise	3.0	3.0 all side
	High rise	4.5	3.0 all side
500 to 1000	Low rise	4.5	3.0 all side
	High rise	4.5	3.0 all side
Above 1000	Low rise	4.5	3.0 all side
	High rise > 30 m	4.5	4.0

General Development Control Regulations

1	High rise >30 m	8.0	8.0
---	-----------------	-----	-----

Note: For Building Unit area above 500 sq. mts, the minimum side and rear margin shall be as per clause no. 12.4.3.

- In case of subdivision of a Survey No. First Floor with a sub-divided Building-unit upto 500 sq.mts, Building-unit shall have minimum 3mts margin on the side abutting the adjacent Survey No. First Floor. Refer illustration below for further clarity.

12.4.5 Minimum Side and Rear Margins for Industrial Use

Minimum side and rear margin along the periphery of the Building-unit and the minimum margin between two detached structures shall be as stated below:

No.	Area of the Building-unit	Required Side and Rear Margins (in meters)
1	Upto 1000 sq.mts	4.5
2	Above 1000 sq.mts	8.0

Note: A subdivided industrial building unit having area up to 1000sq.m can keep one of the side margins as a zero margin provided with consent from the respective adjacent co-owner.

12.4.6 Minimum Side and Rear Margins for other than Residential and Building-unit with area above 500 sq.mts

No.	Building Height	Required Margins (in meters)
1	Up to 15mts	3.0
2	Above 15mts and up to 25mts	4.0
3	Above 25mts and up to 40mts	4.0

12.4.7, 24.3 Minimum Margin between Buildings

- Minimum distance between two buildings shall be as per the table below:

No.	Building Height	Required Margin (in meters)
1	Upto 15mts	4.5
2	Above 15mts and up to 25mts	6.0
3	Above 25mts and up to 40mts	9.0

- If two buildings next to each other have different heights, required margin for taller building shall be applicable. For example, if one building is of 25mts and the adjacent building is of 40mts in height, the minimum margin between these two buildings shall be 9.0mts.

General Development Control Regulations

3. The length of common wall between any two semi-detached buildings shall not be less than 25% of the maximum width of the building parallel to common wall joining together at every floor.

24.8 2.6.7 Margins from Common Plot

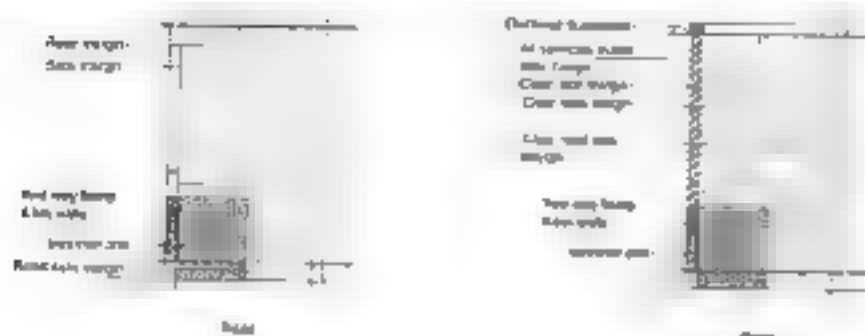

No.	Building Height	Required Margins (in meters)
1	Up to 25mts	1.0
2	Above 25 mts	6.0

24.8 2.6.8 Permissible Uses in Margins

For Residential Dwelling-1 and Dwelling-2 (Except Row House, Cottage Industry and Pre-School)

- Ancillary uses such as parking garage, service quarter w.c. and bathroom shall be permitted as a part of the permissible FSI of the Building Unit, in side or rear marginal space but in no case in Road-side margins, with maximum permissible ground coverage of 16.3 sq.mts and maximum permissible height of 1.0 mts.
 - Surface water tank up to 1.5mts in height.
 - Open, cantilever staircase with maximum width of 100mts and landing space of maximum 200mts at floor level shall be permitted in side or rear margins except roadside margin.
 - Doors, windows or projections shall not be permitted along the common wall of the adjoining property. No rainwater from the roof shall be drained in the adjoining property.
 - Pertation well shall be allowed along the Building Unit boundary on common boundary of semi-detached building and on marginal space between two structures up to maximum height of 5mts.
- For Residential Dwelling-1 and Dwelling-2: Underground water tank, pertation well, bore well and pump room with a maximum size of 2mts X 2mts and with a maximum height of 2mts.
 - For Building-units of all uses other than Industrial and Institutional:
A structure for security cabin including tower of maximum dimensions of 2.0mts X 4.0mts with maximum height of 2.4mts shall be permitted in the Road-side margin. The area of such construction shall not be counted towards computation of FSI.
 - For Industrial and Institutional use, a security cabin structure up to maximum ground coverage of 15sq.mts with maximum height of 2.4mts shall be permitted in the road-side margin. Such a structure shall be at a minimum distance of 4.5mts from the Building. The area of such construction shall be counted towards computation of FSI.
 - Pedestrian access path and stepped approach as per Performance Regulation No. 4-5 shall be permissible in the marginal space.
 - Common Plot shall be permitted in the marginal space.
 - Vehicle connecting ground level with basement level shall be permitted in side and/or rear margin only for:
Building-unit with area up to 2000 sq.mts; or
Building-unit with buildings up to 25mts in height
4-m margin shall be maintained in all sides.

General Development Control Regulations

8. For a building-unit using marginal space for providing electrical infrastructure such as sub-station (as per Regulation No. 12.4.9 (9)), underground water tanks (as per Regulation No. 23.4 and others) these permissible uses shall be allowed on only one marginal side except Road side margin. The other marginal spaces shall be kept clear and accessible at ground level as illustrated above.
9. Electrical infrastructure: Electrical Sub-station, Transformer room, Box-type transformer, Section Feeder Pillar, Auxiliary Power Back-up System and meter room according to standards of the Competent Electric Company shall be permitted in marginal space except Road-side margin of the Building-unit. The area of such construction shall not be covered towards FSI.
10. Refuge Area for Building with height more than 25mts. Cantilever Refuge area required as per Section D: Performance Regulation No.20.24 may be permitted.
11. Fire Escape Staircase for Building with height more than 45mts. Fire Escape Staircase required as per Section D: Performance Regulation No. 24.0 shall be permitted in marginal space except road-side margin.
12. Podium/Ramp as per Section D: Performance Regulation No.19.5 shall be permissible in marginal space.
13. Parking shall be permitted in margin except in Approach Road as illustrated below and as per Regulation No. 12.10.1.7 and 12.10.1.8
14. Elevation provided as per Planning Regulation No. 12.1 shall be permitted within side and rear margins.

5. In any marginal open space, weather shade sun breakers horizontal or vertical projections shall be permitted up to 0.60mts. These projections may also be part of the facade articulation at various

General Development Control Regulations

- levels, but shall in no cases be at the floor level such that they become a part of the habitable space. Such projections shall be allowed above a minimum height of 2.4m from the ground level.
6. For any Building-uses with following uses- Residential-Dwelling-1 and Dwelling-2, Assembly, Educational-1 2&3, Institutional, Public Institutional, the building-uses level may be permitted to be raised up to plinth level. Also steps leading to ground floor on solid plinth shall be permitted.

12.6.9 Restricted Use in Margins

1. The required marginal open spaces except permissible uses as per Planning Regulation 74a, 2.6.9 shall be kept permanently open to sky.
2. This space shall not be used for stacking materials or loose articles for the purpose of trade or otherwise, putting up fixed or movable platforms.
3. Parking shall not be allowed in the marginal space provided as approach road.
4. Vehicular ramp leading to parking in floors above ground level shall not be permitted in the margin. Or the side margin shall be minimum 3.0m wide for putting ramp for vehicles.
5. Pedestrian ramps connecting ground floor with upper floors shall not be permitted in the marginal space.
6. The sunk in lower ground floor or basement provided for the purpose of light ventilation shall not be permitted in the marginal open space.
7. No difference shall be permitted in the ground level of the marginal space of the building (in cases where the permitted margin of the basement is lesser than the permitted margin of the super structure).

12.7 Permissible Ground Coverage

For Residential-1, Residential-2, Traffic and Transport Zone, Public Institutional, Industrial Zones, the entire area available after providing for the required Marginal Green Cover and other Regulations may be utilized for construction of the super structure.

12.8 Internal Open-to-Sky Space

The minimum width of any interior open-to-sky space used for light or ventilation of the rooms shall be regulated based on the smaller side of the open-to-sky space as follows:

No.	Building Height	Minimum dimension of the smaller side
-----	-----------------	---------------------------------------

General Development Control Regulations

1	Up to 15 mts	1 Series
2	Above 15 mts and up to 25 mts	2 Series
3	Above 25 mts and upto 60 mts	3 Series

12.9 Common Plot

12.9.1 Minimum Area of Common Plot

Common Plot is required for Building-units of area 2000 sq.mts or more in all series other than agriculture zone as per following Regulations:

No.	Use	Area of the Building-unit	Minimum Required Area of Common Plot
1	Residential-Dwelling-1, Dwelling-2, Mercantile-1 & 2, Hospital, Service Establishment	2000 sq.mts or more	10% of the area of Building-unit
2	Industrial, Traffic and Transport Zone	Up to 5000 sq.mts Above 5000 sq.mts and up to 20,000 sq.mts 20,000 sq.mts and above	8% of the area of Building-unit $400 \text{ sq.mts} = 16\%$ of the area exceeding 20,000 sq.mts
3	Religious, Educational, 2&3 Institute, Assembly, B2, Public Institution, Traffic and Transport Zone	2,000 sq.mts or more	20% of the Building-unit area or 400 sq.mts, whichever is more
4	For All Use	10,000 sq.mts or more	Additional 6% as per Planning Regulation No. 12.9.2.9

Note: For Building-units with area less than 2000 sq.mts and having buildings with height more than 25 mts, a common plot shall be provided of 10% of the area of Building-unit or 200 sq.mts, whichever is more.

12.9.2 General Requirements for Common Plot

The Common Plot area shall be exclusive of approaches.

- The area of the Common Plot may be sub-divided such that the minimum area of the Common Plot shall be 200 sq.mts for Dwelling-1, and Dwelling-2 and 250 sq.mts for Mercantile-1 & 2, B2, B7, B2&3, with no sides less than 10.0 mts.
- Angle between adjacent sides of the Common Plot shall be 60 degrees or more.

General Development Control Regulations

4. No construction shall be permissible in the Common Plot except Electric substation, Transformer room, Auxiliary power generator, Box-type transformer, section feeder pillar, mess room, over and underground water tank and pump room, security cabin, Community/ Society common amenities that be allowed to be constructed in the Common Plot subject to the following requirements:
 - a. Maximum Ground Coverage of 35% of the respective Common Plot.
 - b. Maximum Height of construction shall be 7.5mts from the level of the Building Unit except in the case of overhead water tank, where more height may be permitted.
 - c. Community/ Society common facility shall be permitted on a Common Plot. The area of the Community/ Society common facility shall be considered towards compensation off-set of the Building Unit.
 - d. Such a building shall be required to maintain the minimum margin requirements between buildings with respect to the adjacent buildings as per Planning Regulation 740 (2.6.4) and Road Side Margins as per Planning Regulation 740 (2.6.5)
5. In case of Residential-Dwelling-I and Dwelling-II use, 50% of the Common Plot may be allowed to be used as parking space including drive way and access. Parking in common plot shall be permitted in roadside margin after leaving minimum 1.5mts from the Building unit boundary. This minimum 3m shall be utilized for shade giving trees and plantation purpose.
6. In case of all other uses except Residential-Dwelling-I and Dwelling-II use, complete area of the Common Plot may be allowed to be used as parking space including driveway and access. Such parking shall be permitted in roadside margin after leaving minimum 1.5 mts from the building-unit boundary. The minimum 3m shall be utilized for shade giving trees and plantation purpose.
7. In cases where layout or subdivision of Building Unit is sanctioned with provision of required Common Plot, Common Plot shall not be insisted in case of sub-division of such sub-divided new Building-unit and/or amalgamation of such sub-plots and/or further development of such sub-divided new Building-unit irrespective of its area.
8. The Owner shall be required to give an undertaking that the Common Plot shall be used exclusively for the residents/ occupants of the Building-unit. On issuance of the Development Permission, the Common Plot shall deem to have vested in the society/ association of the residents/ occupants. The Common Plot shall not be sold to any other person.
9. For a Building-unit having area of .0.000sq.mts or more an additional 4% area of the Building-unit shall be provided for thick plantation. This area shall be exclusive of the margins and Common Plot. The area demarcated for this shall have a minimum dimension of 3mts. The types of trees shall be selected such that they are shade-giving trees as mentioned in Schedule 22.
10. Common Plot shall not be allowed within Atrium or any covered space.

12.10 Parking

Parking spaces for vehicles shall be provided within the Building-unit for every new Building and for extension in existing building constructed for the first use and for when the use of old building is changed to any of the uses mentioned in the table below:

No.	Type of Use	Minimum Parking Required	Visitor's Parking and Remarks
-----	-------------	--------------------------	-------------------------------

General Development Control Regulations

No.	Type of Use	Minimum Parking Required	Visitor's Parking and Remarks
	Detached & semi-detached dwelling units, Row houses, Tenements, Pre-school	1 car parking - for more than 80 sq.mts. and up to 300 sq.mts of plinth area per unit. Additional 1 car parking for every 100 sq.mts additional plinth area per unit. This shall be provided within the marginal space	N/A
	Apartments, Hostels, Dharmshala	25% of Total Utilised FSI	5% of the required parking space shall be provided as visitors parking
2	Residential (Dwelling-1 and Dwelling-2 + Mercantile)	(a) For respective Residential (Dwelling-1 and Dwelling-2) use parking shall be provided as Residential as the case may be (b) For respective Mercantile use parking shall be provided 50% of total Utilised FSI	5% of residential Dwelling-1 and Dwelling-2 parking requirements (a); and 20% of the Mercantile parking in (b) shall be provided as visitors parking
3	Assembly- 2A	50% of Total Utilised FSI	20% of the required parking shall be provided as visitors parking
3	Sports Complex	10 sq.mts of parking area per person of the Total stadium capacity	
4	Mercantile, Business Building, Retail, Hospitality, Traffic and Transport Zone	50% of Total Utilised FSI	20% of the required parking shall be provided as visitors parking
4a	Institutional Buildings, Public-Institutional Buildings	50% of Total Utilised FSI	In case of Hospitals and nursing homes, additional parking of Ambulance shall be provided at the ground level
5	Industrial, Storage	0% of the Total Utilised FSI	N/A
6	Educational	(a) Primary & Pre-Primary Schools - 25% of the Total Utilised FSI (b) Secondary & Higher Secondary Schools - 40% of the Total Utilised FSI (c) Colleges and coaching classes - 40% of the Total Utilised FSI	For day for drop-off and pick-up shall be provided within driveway. 10% of the required parking shall be provided as visitors parking
7	Sports & Leisure	25% of Building-unit Area	
8	Parks	10% of Building-unit Area	

Notes:

In case the maximum permissible FSI is not utilized, for any extension or additions in the future, additional parking @ 10% shall have to be provided as required for the additional utilized FSI.

General Development Control Regulations

2. Building Unit having area up to 750 sq. mts. shall be permitted to provide 30% of the utilized FSI area for parking in the place of 50% for uses as mentioned in the above table.
3. Building Unit having an area above 750 sq. mts. and upto 2000 sq. mts. shall be permitted to provide 40% of the utilized FSI area for parking in the place of 50% for uses as mentioned in the above table.

(2.10.) General Requirements for Parking

Parking requirement for a Mixed-Use development shall be calculated on pro-rata basis of the FSI consumed specific to the different uses.

2. Parking is permitted at any floor level above ground and at more levels of basement as per required parking, with provision of vehicular ramp.
3. 50% of the required visitors parking shall be provided at the ground level.
4. 50% of all required parking shall be provided for cars.

1. For Building-units with approved existing buildings, additional buildings shall be permitted with compliance to Regulations for construction of a new building.
2. The additional buildings shall be permitted as per remaining FSI (i.e. after deducting the utilized FSI of the approved existing building from the maximum permissible FSI of the entire building-unit) with compliance to respective margins, permissible height, uses and all other applicable regulations.

12.4 Row Type Buildings

The minimum area of plot on which row houses are to be constructed shall be 1000 sq.mts

2. The minimum length of common wall between the two adjacent row houses shall be 50% of the depth of the row house.
3. The minimum size of an individual sub-plot of a row house shall be 40 sq.mt. Maximum permissible built up area shall not exceed 60% of an individual sub plot and the minimum width of the plot shall not be less than 4.0 mts.
4. Minimum margin in the front shall be 1.8 mts. and rear margin shall be 2 mts. The end plot in a row house shall also have minimum side margin of 2.0 mts. on the side abutting on road.
5. 5.0 mt. wide space open to sky shall be provided at the end of every such 0 continuous houses of row houses.
6. Such row houses shall be ground + two floors structures with a maximum height of 10.0 mts. In case of hollow plinth provided at ground floor for parking the height shall be considered from the top of hollow plinth. A user cabin, cover for internal courtyard, water tank will be allowed to project beyond this.
7. Requirements for common plot shall be regulated as per the provision of 2.9 irrespective of number of row houses to be developed.
8. There is should be a common outlet for the sewerage from each plot which can be connected when Sewerage line is implemented. The depth of soak pit shall be minimum 80"40"
9. All bedrooms and toilets shall have direct ventilation.
10. The width of internal approaches/road for such development shall be regulated as under
11. The roads and layouts shall be minimum 7.5 mts. Wide.

Sr. No.	Length of Road	Width of Road
1	Up to 150 mts.	7.5 mts.
2	More than 150 mts and up to 300 mts	9.0 mts.
3	More than 300 mts and up to 450 mts	10.5 mts.
4	More than 450 mts	12.0 mts.

- While determining the width of the road, the length of the road up to the intersection of the road shall only be taken into consideration and the length of the road beyond the intersection shall not be clubbed.
- All internal roads shall have curvatures as per Regulation No. 12.3.2.

13. AGRICULTURAL ZONES**13.1 For General Agriculture Zone****13.1.1 Minimum Area of a Building-unit**

Minimum Area of any block no./survey no./Hissa no./FP no. Only one farm house shall be 4000 sq. mts.

2. No sub-division of land shall be permitted.

13.1.2 Margins

1. Road-side Margin shall be minimum 30mts from the boundary of Building-unit.

2. Side and Rear Margins shall be applicable as per Planning Regulation No. 24.

3. Minimum distance from any water body shall be maintained as specified in Performance Regulation No. 23.

13.1.3 Margins

Common Plot is not required for Building-units in Agriculture Zone.

13.1.4 Permissible Uses, FSI, Ground Coverage and Maximum Permissible Height

No.	Permissible Use	FSI	Ground Coverage	Maximum Permissible Building Height	Remarks
1	Detached Dwelling Unit	0.1	5%	8 mts.	1. Only one farm house per building unit shall be permitted. 2. Minimum area of any block no./survey no./Hissa no./FP no. shall be 4000 sq. mts.
2	Agriculture, Sports & Leisure, Parks, Assembly-4	0.1	5%	15mts	Minimum area of any block no./survey no./Hissa no./FP no. shall be 3000 sq. mts. provided that in case of Assembly-4 the minimum area shall be 10000 sq. mts.
3	Religious, Agriculture, Agro Industries, Storage, Public Utility.	0.45	40% - 55%	4 Storeys	Minimum area of any block no./survey no./Hissa no./FP no. shall be 3000 sq. mts. Except Public Utility & Institutional.

14.1.2 Margins

1. Minimum margins shall be as per table below.

No.	Minimum Road Side Margin (meters)	Minimum Side & Rear Margin (meters)
	12.0	6.0

2. The Road side margin may be permitted to be covered up to 6mts. from the building line with a projected cantilever structure (porch) at a height of not less than 1.00mts from the ground level. This cantilever structure shall not be counted towards computation of FC.
3. Parking shall be permitted in road-side margin after leaving minimum 6.0mts from the Building unit boundary. This minimum 6.0m shall be utilized for shade giving trees and plantation purpose.

General Development Control Regulations

15. FUELLING STATIONS

Building-unit for use as Fuelling Stations shall comply with Petroleum Rules 1974 under the Petroleum Act, 1934.

15.1 Area and Frontage

The minimum area and frontage of a Building-unit for a Fuelling Station or Fuelling with Service Station shall be as follows:

No.	Fuelling Station Type	Minimum Area of Building-unit	Minimum Frontage on Road Side
1	Fuelling Station (without Service Station)	1000 sq.mts	30mts
2	Fuelling with Service Station	2000sq.mts	30mts

15.2 Location

1. Fuelling Station shall be permitted only on Roadwidth of 30mts and more in any Zone.
2. The location of Fuelling Station or Fuelling with Service Station shall be at a distance of 50mts away from the junction of two or more roads. The minimum distance shall be computed from the boundary line of the Building-unit to the edge of the road as indicated in the illustration.
3. In the case the Station is provided along a main road which has a service road or a marginal access road, the access to the Station should be provided from the service road or the marginal access road and not from the main road.

**15.3 Maximum Permissible Ground Coverage**

Maximum Permissible Ground Coverage for Fuelling Station and Fuelling with Service Stations shall be 45% of the Building-unit including the area of the canopy.

15.4 Margins**15.4.1 For Fuelling Stations:**

1. Road side margin from canopy to the plot boundary shall be as per Planning Regulation No. 12.6 subject to minimum 6.0mts. On all other sides, margin from canopy to the plot boundary shall be 4.5mts and 6.0mts in the case of canopy having height up to 6.0mts and more than 6.0mts from ground level respectively.
2. Marginal distance from curb site (Fuelling Pedestal) to the plot boundary towards main road shall be minimum 9.0mts and for other sides of the plot, it shall be 6.0mts.
3. Administrative building for the petrol pump shall have minimum road side margin as per Planning Regulation No. 12.6— minimum side and rear margin of 3.0mts and as per Planning Regulation No. 12.7. Zero margin can be provided towards canopy but minimum 6.0mts clear drive way shall be provided to any curb site.
4. Minimum 6.0mts clear drive way shall be maintained between every curb site (fuelling pedestal).
5. Minimum width of access road shall be 6.0mts.

15.4.2 For Fueling Station with Service Station.

Road side margin from canopy to the plot boundary shall be as per Planning Regulation No. 26, subject to minimum 6.0mts and all other sides shall be 6.0mts. Provision of above (2) and (4) in Planning Regulation No. 15.4.1 will remain the same.

2. While building of service station can have zero margin towards canopy subject to minimum 6.0mts towards road side and 3.0mts towards other sides of the plot.
3. Clear 6.0mts drive way between curb line (Fueling pedestal) and service station building shall be provided.
4. Minimum width of access road shall be 6.0mts.

15.5 Height

The maximum allowable height shall be 7.5mts.

15.6 Floor Space Index

Subject to other Regulations.

15.7 Common Plot

Common Plot shall not be required.

15.8 Parking

Every Fueling Station and Fueling with Service Station should provide minimum parking spaces on the basis of the building unit Area as stated in the table below:

No	Fueling station (area)	Minimum parking
1	Fueling station up to 1000 sq. mts	3 cars and 5 two-wheelers
2	Fueling station more than 1000 sq.mts	For every 500 sq.mts more than 1000sq.mts, additional parking for four and 2 two-wheelers shall be required.

15.9 15.9 Requirement

No basement shall be allowed.

The height of a boundary wall towards the road-side shall not exceed 1.5m from the crown of the adjacent road and 1.8m from the crown of the adjacent road for all other sides of the building unit.

2. For building-units at junction of roads, a grill fence shall be provided with the following provisions:

- At least 50% perforation in the grill.
- The base of the fence shall not exceed 0.8m from the level of the crown of the adjacent road for a length of 5m, from the corner of the building-unit at the junction.

For Industrial Buildings: The height of a boundary wall on all sides shall not exceed 3m from the crown of the adjacent road.

**19.2 Boundary Gate/Compound Gate**

Boundary gate shall not open outward and shall be provided with a means to prevent the gate from opening outward on the pavement or road.

2. The minimum width of a boundary gate for all uses except Residential shall be 6m.**3. For building-units at junction of roads, the following shall be applicable:**

- A gate shall not be permitted on the curve of the boundary wall.
- If the adjacent road width is equal or more than 12m, the opening in the boundary wall shall be located at a minimum distance of 5m from the corner of the building-unit at the junction. If the length of the road side edge is less than 15m, the opening in the boundary wall shall be provided at the junction end from the junction.

**19.3 Level of Building-unit**

The level of the Building shall be established with respect to the average ground level or High flood level, as may be applicable. This level shall in no cases be lower than the crown level of the adjacent road. For Building-units with access from two or more roads, the level shall be considered from the wider road.

In the case of a building-unit where the level of the land is lower than the crown of the road in front and which in the opinion of the Competent Authority could be drained off in the storm water drainage and sewer, the Competent Authority may permit a suitable lower level.

Any difference between the building-unit level and road level shall be accommodated within the building-unit boundary.

9.1.4 Paving in Building-unit

Maximum of 30% of the total open space including marginal open spaces and common plot of a building-unit shall be paved. The remaining shall be permeable for rain water percolation.

17.5 Access Path

1. Access path from the building-unit entry to the building entry or plinth shall have a minimum width of 2mts with an even surface and devoid of steps.
2. In case of a sloping access path, the gradient shall not be greater than 1:12.
3. Any difference between the road level and building-unit level shall be accommodated within the building-unit boundary.

For all Buildings:

Minimum one entrance shall be provided that is accessible by people with disability and accompanied by appropriate signage as per Regulation No. 19.7

2. Minimum width of the ramped access path shall be 1.2 mts, 1.5mts and 2mts for the ramp length of 3.6mts, up to 9mts and more than 9mts respectively. The pedestrian ramp leading main entrance required as per these regulations may be provided in the margin. In case of sloping access path or ramp:
 - a. The gradient shall not be greater than 1:12.
 - b. Minimum width of ramp shall be building-unit boundary 2mts and the maximum continuous length shall be 9mts. Such ramp shall have 800mm high hand rail on both sides extending 100mm beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50mm.
 - c. Entrance landing shall be providing adjacent to ramp with the minimum dimension 2mts x 1.5mts.
 - d. The surface material shall adequately guide visually impaired by using colour and brightness that is different from the surrounding floor material or by using guiding floor material that emits different sounds.
 - e. Finishes shall have a non-slip surface with a texture traversable by a wheel chair.
 - f. Curbs, wherever provided, should blend to a common level.
5. For any additional stepped approach:

General Development Control Regulations

- Minimum width shall be 1.35mtr.
- Size of tread shall not be less than 300mm. and maximum riser shall be 150mm.
- The steps shall not have abrupt (square) nosing.
- Maximum number of risers on a continuous flight without landing shall be limited to 12.
- The stepped approach shall be provided with 800mm high hand rail on both sides. Hand rails shall extend 300mm on the top and bottom flight of the steps.
- All steps edges shall have a contrasting colour band of 30mm width stretch across the step width. The edges should also be non-slippery.

9.6 Plinth

- The plinth of the habitable area of any building shall be at a minimum height of 0.45mtr from the established level of the building-plot.
- The building may be permitted on hollow plinth at the ground level with the following provisos:
 - Has maximum height of 3.5mtr from finished ground level to finished floor level and minimum height shall be 3.0mtr from finished ground level to finished floor level and is free of enclosures except for staircase and other permitted uses under the Regulations.

9.7 Entrance

For all buildings other than Residential entrance with the following specifications shall be provided:

Minimum clear opening of the entrance door shall be 900mm and shall not be provided with a step that obstructs the passage of a wheelchair user.

- Level difference at threshold shall not exceed 2mm.
- Manual doors should incorporate kick plates 100mm high to withstand impact of wheelchair footrest where doors are glazed.
- Door handle and locks should be positioned between 900-1000mm above floor and must enable the user to operate it with a single hand.

9.8 Minimum Clearance Height in Buildings

- For Dwelling Units or Mercantile Buildings:
 - All habitable spaces shall have minimum height of 2.9mtr between finished floor levels. Height of room.
 - All circulation and service spaces such as verandah, bathroom, washroom, toilet, passage, porch, room, staircase and stair cabin shall have a minimum clearance height of 2.1mtr.
- For Industrial Uses, all occupiable spaces shall have a minimum clearance height of 3.0mtr.

General Development Control Regulations

3. In case of folded roof, minimum clearance height shall be 2.0mts (measured from the lowest point of the fold).
4. In case of sloping roof, minimum clearance height shall be 2.2mts (measured from the lowest point of the roof). The average height of the room shall not be less than the minimum clearance height as applicable according to the building use and stipulated above.
5. In case of trussed roof, minimum clearance height shall be measured from the floor level to the bottom of the tie beam and shall be 2.8mts.
6. For Hollow Plinth: Spaces at hollow plinth for the purpose of parking with maximum height of 3.5mts from finished ground level to finished first floor level and minimum height shall be 2.5mts from finished ground level to finished first floor level.
7. For Basement: Basement exclusively used for parking shall have minimum height of 2.8mts, and maximum height of 3.8mts, measured from finished basement floor level to finished upper floor level. In case of mechanical parking more height may be permitted.

**9.1.9 Mezzanine**

Mezzanine floor shall have a minimum clear height of 2.1mts which may be allowed in a room at a minimum clear height of 2.1 mts from the floor level if the area does not exceed 30% of the area of the enclosed space.

9.1.10 Loft

Loft of a maximum height of 2mts may be allowed in a room at a minimum clear height of 2.1mts from the floor level if the area does not exceed 30% of the area of the enclosed space.

9.1.11 Basement

Basement is allowed within a building-unit as per specifications in Section C Planning Regulations. The usage of basement to conform to Section C Planning Regulation No. 13.1.4.

2. The area available after providing the required margins may be utilized for basement.
3. It may be provided at more levels as per Section C Planning Regulation No. 2.1.2.
4. Basement in a building shall have a minimum clear height of 2.8mts.
5. If basement is used for parking, vehicular ramps shall be provided as specified in Performance Regulation No. 9.1.15.
6. In cases where the permitted margin of the basement is lesser than the permitted margin of the super structure, no level difference shall be permitted in the marginal space of the building. Such marginal space shall be open to sky and motorable as per Regulation No. 20.3.
7. During construction of basement, necessary shoring and strutting including sheet piling shall be required.
8. Provision for drainage or water supply shall not be permitted in the basement.
9. Material used for construction of basement shall be fire resistant. Wood or any other combustible material shall not be used as structural members of a basement.
10. Access to the basement to be provided as per Performance Regulation No. 9.1.4 and 9.1.5.

General Development Control Regulations

9.1.3 Railings

1. A parapet railing with a minimum height of 1.15mts. from the finished floor level shall be provided to ensure safety at all accessible edges of a building such as roof edges, staircase, terrace, balcony, floor edges or any large openings and/or fully glazed window.
2. Railing for staircase shall be as per Performance Regulation No. 20.6. (B)

Note: It shall be permitted to provide two staircases of width 1.5mts as an alternative of one staircase of 2.0mts, two staircases of width 2mts as an alternative of one staircase of 1.5mts within the travel distance as specified in table 19.1.4.1.a below.

19.1.4.1.a Staircase for Basements

- The staircase to the basement shall have the same width as the regular staircase leading to upper floors.
- Any staircase leading to the basement shall be as per Performance Regulation IV-20.6
- A staircase shall be provided from the lowest level of the basement as a means of egress exit at a travel distance mentioned in the table below.

Building Use	Travel Distance
1. Residential (Dwelling-1 and Dwelling-2) Use	30
2. Non-residential (Dwelling) Use	25
3. Hazardous Use	20

- Staircase for all Buildings other than detached and semi-detached dwelling units: Separate staircase shall be provided if the ground floor or any other floor is a residential building is used for non-residential purpose.
- For all buildings, staircase shall be conform with Performance Regulation IV-20.6.

19.1.5 Ramp

19.1.5.1 Ramp for Vehicular Access

General Development Control Regulations

- a. Minimum width and radius for a ramp for two-wheelers, car and trucks, respectively are specified in the table below:

Vehicle	Minimum width of ramp (meters)	Minimum radius of inner curve (meters)
Two-wheeler	2.0	2.0
Car	3.0	3.0
Truck	6.0	4.0

- b. The maximum slope of ramp shall be 1:7
 c. A level platform of width equal to ramp width and length of minimum 4.3mts. shall be provided at end of the ramp at ground level and basement level.
 d. A minimum clear height of 2.8mts shall be maintained at all points on the ramp.
 e. For parking in basement/s, the number and width of ramp shall be provided as specified below and as per 9.5.2 (as applicable):

Area of Parking in Basement	Number of Ramps	Width of Ramp
< 750 sq.mts	1	5.0 mts
≥ 750 sq.mts	1	6.0 mts
	2	3.25 mts each

2. Ramp for Pedestrians. For Buildings exceeding three height with following uses: Institutional, Assembly, Public Institutional, Educational, 2. Mercantile, a pedestrian ramp shall be provided unless provision for lift is made as per Regulation 14.9.2. The ramp shall be provided with the following specifications:

- a. The minimum width of the ramp shall be 1.2mts, 1.5mts and 1.8mts for the ramp length of 1.8mts, up to 9mts and more than 9mts respectively.
 b. A landing shall be provided of 1.5mts depth for every 9mts length of the ramp.
 c. The slope of a ramp shall not exceed 1 in 12.
 d. Surface of the ramp shall be slip-resistant and the edge of the ramp shall be protected with a minimum height of 80mm.
 e. Handrails on the ramps shall be on both sides at two levels at 700mm and 900mm, both ends shall be rounded, grouted and extended 300mm beyond top and bottom of ramp.
 f. Entrance landing shall be provided at the starting and ending level of the ramp with clear minimum length equal to 1.8mts.
 g. Ramps shall lead directly to outside open spaces at ground level or courtyards or other open places.

19.2 Parking

19.2.1 Parking to be provided

In any building, provision for parking shall be made as per requirements specified in Section C, Planning Regulations.

Parking for people with disability shall be provided for all buildings and facilities other than residential dwelling as per Performance Regulation No. 19.2.2(5).

17.2.2 Design of Parking for Cars

5. Parking layout for cars in all buildings shall conform to the following Specifications:

Minimum dimension of a space provided for parking a car shall be 4.5m x 3.0m.

2. Each car parking space should be connected to the street providing access to the building-unit by means of an access/exit lane.
3. Minimum width of the access/exit lane for single-sided parking shall be 3mtrs and for double-sided parking layout, the minimum width of the access lane shall be 5.5mtrs.
4. A minimum clear height of 2.1mtrs shall be maintained at all points in the parking space and access/exit lanes.
5. Minimum provision of one accessible car parking space shall be provided for people with disability for every 25 car parking spaces or less. The accessible car parking space shall:
 - a. have a minimum width of 2.5mtrs.
 - b. have a 1.2mtrs side transfer bay. This can be shared by two successive parking bays.
 - c. be located within 30mtrs from the main entrance of the building.
 - d. have appropriate signage indicating that the space is reserved for wheel chair that are conspicuously displayed as specified in Regulation No. 97.
 - e. have guiding floor materials or have a device to guide visually-impaired persons with audiotape or any other device which serves the above purpose.
 - f. Maximum 50% of the parking reserved for visitors shall be provided at ground level.

10.2.1 Design of Parking for Two-Wheelers

Parking layout for two-wheelers in all buildings shall conform to the following specifications:

Minimum dimension of a space provided for parking a two-wheeler shall be $0.90 \text{ m} \times 2.0 \text{ m}$.

2. Each two-wheeler parking space should be connected to the street providing access to the building-unit by means of an access/exit lane. Minimum width of the access/exit lane shall be 2.0mts.
3. A minimum clear height of 2.0mts shall be maintained at all points in the parking space and access/exit lane.

19.2.4 Design of Parking for Tractors

Parking layout for trucks in all relevant buildings shall conform to the following specifications:

1. Minimum dimension of a space provided for parking a truck shall be 4.0mts X 8.0mts.
2. Each truck parking space should be connected to the street providing access to the building-unit by means of

General Development Control Regulations

an access/exit lane. Minimum width of the access/exit lane shall be 4.0mcs.

19.3 Lighting

Adequate natural and artificial lighting as published in the National Building Code of India, Part VII Building Services, Section 4, shall be provided in all parts of a building to the satisfaction of the Competent Authority.

19.4 Ventilation**19.4.1 Ventilation of Rooms**

Every habitable and usable room shall be equipped for adequate ventilation by provision of windows and/or ventilators that open directly into an open space or semi-open space such as courtyard or verandah. The size of such an open space shall be minimum one-seventh of the floor area of the room.

2. The aggregate of all openings including doors, windows and ventilators in a room shall be minimum one-seventh of the floor area of the room.
3. Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VII Building Services, Section-4 Lighting and Ventilation, National Building Code and to the satisfaction of the Competent Authority.

19.4.2 Ventilation of Basement

Every basement shall be ventilated adequately for its respective use. Vent Duct openings shall be permitted at Building-entrance level in accordance with Performance Regulation No. 20.23. Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VII Building Services, Section-4 Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

19.4.3 Ventilation of Atrium

Any atrium covered from top shall be provided with provision of light and ventilation.

19.4.4 Ventilation of Bathrooms and Water Closets

1. Every bathroom and water closet shall be ventilated adequately.
2. At least one of the walls of a water closet or bathroom or sanitary block shall have an opening of minimum 0.25 sq.mts. for each unit of w.c. or bathroom. Such opening shall open into an open to sky space with minimum dimension of 0.9mts X 0.9mts.
3. Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VII Building Services, Section-4 Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

19.4.5 Ventilation of Staircase for Residential Dwelling-1 and Dwelling-2:

1. For ventilation by windows: Every staircase shall be ventilated adequately from an open space with a minimum area of 1sq.mts. The aggregate area of all windows provided shall be at least 1.2sq.mts at each stair landing or floor in the enclosing wall of the space-which opens on such sq.mts open air space.
2. For mechanical ventilation: Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VII Building Services, Section-4 Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

19.4.6 Ventilation of Industrial Buildings

Every stable room shall be equipped for adequate ventilation by provision of windows, ventilators, skylights or artificial means.

- For natural ventilation, every room in such building shall be in and ventilated by adequate number of windows, ventilators and sky lights exclusive of doors having clear opening not less than 1/7th of the floor area abutting on open air space of width not less than 1/3rd of the height of the part of the building abutting such open space.
- Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-1 Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

19.4.7 Ventilation of Special Buildings

- Every auditoriums, halls and other special buildings shall be naturally in and ventilated by doors, ventilators and windows abutting on an exterior or exterior open air space which shall not be less than 1/5th of the total floor area.
- Any deficiency shall be compensated by use of mechanical system such as exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-1 Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

19.4.8 Change of ventilation system

No permission shall be granted to convert an existing air-conditioned theatre to a non-air-conditioned theatre.

19.5 Heating and Air Conditioning

Adequate heating and air conditioning as published in the National Building Code of India, Part VII Building Services, Section 3- Air Conditioning, shall be provided in all parts of a building and to the satisfaction of the Competent Authority.

19.5.1 Air-Conditioning of Special Buildings

Auditorium or cinema hall shall be air-conditioned as per following specifications:

- Temperature Range- 22 to 26.5 degree Celsius (72°p to 80° F).
- Change of Air per hour-approximately 10 times.
- Relative Humidity- 50 to 60%.
- Fresh Air Requirement- 7.5 CPM per person.

19.6 Water-related Requirement**19.6.1 Water Storage Tank**

Water storage tank shall be maintained to be perfectly mosquito-proof condition, by providing a properly fitting hinged cover and every tank more than 50 mts. in height shall be provided with a permanently fixed non-horizout metal ladder to enable inspection by any-person staff.

19.6.2 Drinking Water Supply

In all buildings other than residential buildings, suitable provision of drinking water shall be made for the people with a facility near the accessible toilet provided under Performance Regulation No. 992.

19.7 Signages

Signage directly pertaining to the use of the building may be erected on the plot.

For all Buildings other than Residential/Dwelling:

General Development Control Regulations

Signages pertaining to the internal building uses shall be provided. Such signage shall comply with the following:

1. The size of lettering shall not be less than 20mm to enable easy legibility
2. Public Address System may also be provided in busy public areas.
3. The symbols or information should be in contrasting colour and properly illustrated to help people with limited vision to differentiate amongst primary colours.
4. International symbol mark for wheel chair is shown below be installed at the lift, toilet, staircase, parking areas etc. that have been provided for people with a disability.

5. For educational, hospitals and government buildings, information board in Braille shall be installed on a wall near the entrance at a suitable height. It should be possible to approach them closely. To ensure safe walking, there should not be any protruding sign which causes obstruction in walking.

9.8 Letter Box

In all case of building having more than two floors including ground floor a letter box for each separate unit shall be provided at ground floor level to facilitate easy mail delivery

9.9 Sanitation

Minimum sanitary accommodation shall be provided for all proposed buildings and additions and extensions to existing buildings.

9.9.1 For Residential Buildings

The minimum sanitary requirements for a residential dwelling unit shall be one water closet of minimum 0.9sq.mts area.

9.9.2 For All Buildings other than Residential Dwelling

1. Minimum one special water closet shall be provided for the use of persons with disability with provision of wash basin and drinking water at the ground level.

- a. Minimum size of toilet shall be 6 mts. x 1.75 mts.
- b. Minimum width of door shall be 700mm with outward door swing.
- c. Suitable arrangement of vertical or horizontal hand rails with 50mm clearance from the wall shall be provided.
- d. W.C. seat shall be 500mm from the floor.

2. Water closets shall be provided for each gender with a minimum area of 0.9 sq.meters. The number of water closets shall be decided on the basis of the maximum number of building users of that gender at any time and as specified in the table below:

General Development Control Regulations

Building Use	Rate for No. of Users	No. of Users	Min. No. of Urinals	Min. No. of Water Closets	Min. No. of Washbasins or Wash area
Educational	1 user per 1sq.mts per carpet area		5 or 1 per 50 male users or less, whichever is more	2 or 1 per 200 users or less per gender whichever is more	
Business	1 user per 4sq.mts per carpet area	<20	may be provided	1 WC per gender each	
		21-100	1 per 25 male users or less	1 per 25 users or less per gender	
		101-500	1 per 50 male users or less	1 per 50 users or less per gender	
		>500		1 per 100 users or less per gender	
Industrial Storage	1 user per 25sq.mts of carpet area	1-100	1 per 100 male users or less	1 per 25 users or less per gender	4 sq.mts of wash area
		> 100	1 per 50 male users or less	1 per 50 users or less per gender	4 sq.mts of wash area
Special Buildings	1 user per seat		2 per 25 users or less	1 per 100 users or less per gender	1 washbasin per 200 users or less

- Minimum 25% of such water closets and urinals shall be provided in common and accessible locations of the building.
- These sanitation facilities shall be provided with signage indicating the use and the intended users' gender as per Performance Regulation No. 19.7.

19.7.3 For Special Buildings

The number of water closets shall be decided on the basis of the number of users provided. Water closets shall be provided for each gender apportioned suitably.

19.18 Drainage

The manner in which it is intended to connect the drainage system of a building to a public sewer shall be subject to approval by the Competent Authority. Regulations for construction, maintenance and control of drains, sewers, drainage and sewage works of any description within Development Area shall be as per the norms of Gujarat Pollution Control Board.

19.21 Provision of Septic Tank, Seepage Pit and Soak Well

In the case where there is no drainage facility available for the land to be developed, the owner shall provide septic tank, soak pit or soak well for disposal of sewage and waste water.

Location and sub-soil dispersion. A sub-soil dispersion system shall not be closer than 12mts to any source of drinking water such as a well, to mitigate the possibility of bacterial pollution of water supply. It shall also be as far removed from the nearest habitable building as economically feasible but not closer than 2mts to avoid damage to the structure.

2. Dimensions and Specifications:

- a. Septic tank shall have a minimum inner width of 75cms, a minimum depth of meter below the water level and a per capital minimum liquid capacity of 85 litres. The length of the tank shall be least twice the width.
- b. Septic tanks may be constructed of brick work, stone masonry, concrete or other suitable material as approved by the competent authority.
- c. Under no circumstances should effluent from a septic tank be allowed into an open channel drain or body of water without adequate treatment.
- d. The minimum normal diameter of the pipe shall be 100mm. Further at junction of pipework manholes, the direction of flow from a branch connection should not make an angle exceeding 45 degree with the direction of flow in the main pipe.
- e. The gradients of land-drains, under-drainage as well as the bottom of dispersion trenches and soak wells should be between 1:300 and 1:400.
Every septic tank shall be provided with a ventilating pipe of at least 50mm diameter. The top of this pipe shall be provided with a suitable type of mosquito proof wire mesh. The ventilating pipe shall extend to a height which would cause no smell or nuisance to any building in the area. Generally, the ventilating pipe should extend to a height of about 2mts above the septic tank building when it is located closer than 15mts.
- f. When the disposal of a septic tank effluent is in a seepage pit, the seepage pit may be of sectional dimension of 90cms and not less than 100cms in depth below the inner level of the inlet pipe. The pit may be lined with stone, brick and concrete blocks with dry spongy earth which should be backed with at least 7.5cms of clean coarse aggregate. The level above the inlet level should be narrowed to reduce the size of the R.C.C. cover slab. Where no lining is used, especially near street, the outside pit should be filled with loose stones. A masonry ring should be constructed at the top of the pit to prevent damage by flooding of the pit by surface run off. The inlet pipe should be taken down to a depth of 30cms from the top as anti-mosquito measure.
- g. When the disposal of septic tank effluent is in a dispersion trench, the dispersion trench shall be 50 to 100cms wide, excavated to a slight gradient and shall be provided with a layer of shed gravel or crushed stones 15 to 25cms deep. Open, galvanized pipes placed inside the trench shall be made of unglazed earthenware clay or concrete and shall have a minimum internal diameter of 70 to 100mm. Each dispersion trench should not be longer than 30mts and trenches should not be placed closer than 1.5mts to each other.

The above mentioned Regulations shall be subject to modification from time to time as required by Gujarat Pollution Control Board/Competent Authority.

19.11 Electrical Infrastructure

Adequate Electrical Infrastructure as published in the National Building Code of India, Part VIII - Building Services, Section 2: Electrical Installations, shall be provided in all buildings to the satisfaction of the Competent Authority.

19.12 Lifts and Elevators

- 9.2 For Buildings exceeding 4mts height with following uses: Institutional, assembly, Public Institutional, Educational-2

Minimum one lift shall be provided to access public areas on floors above ground level.

19.12.2 For Buildings exceeding 15mts height

- a. For buildings with height more than 15mts, lifts shall be required as per the following table:

General Development Control Regulations				
No	Building Use	Height of Building	Minimum no. of Lifts (whichever is more from columns A and B)	
			A	B
1	Dwelling	Above 5mts Above 25mts	Minimum 1 or Minimum 2 or	1 lift per Thirty dwelling units (excluding dwelling units on ground level and two upper floors or hollow-plinth and two upper floors)
2	Non-residential	Above 5mts Above 25mts	Minimum 1 or Minimum 2 or	1 lift per 1000 sq.mts (excluding area on ground floor and two upper floors or hollow-plinth and two upper floors)

4.2. For buildings with height above 25.0 mts, one of the required lift shall be a fire lift, in conformity with Fire Safety Regulations 200

19.12.1 General Requirements for Lifts and Elevators

1. Lift shall be provided from the ground level or lower level.
2. Minimum capacity of the lift shall be for six persons.
3. Lifts of 6, 8 and/or 12 person capacity can be permitted, as approved by competent authority by considering the peak hour passenger volume. Where required minimum number shall be provided as applicable as per the regulations.
4. A clear door opening with minimum width of 900mm shall be provided. A clear landing area in front of the lift doors shall have minimum dimensions of 1.8mts x 1.8mts.
5. A handrail of 600mm length shall be provided at a height of 1mts from the floor of the lift car.
6. The duration of an automatic closing lift door shall be minimum 5 seconds with a maximum closing speed of 0.25 m/sec.
7. The interior of the lift cabin shall be equipped with a device that audibly indicates the floor level reached and whether the door of the cabin is open or closed.
8. Number and type of lifts to be provided in different types of buildings shall conform to standards specified in the National Building Code of India, Part VPM -Building Services, Section 5: Installation of Lifts and Escalators.

All lifts shall also meet fire prevention and safety requirements specified in Performance Regulation No 20.8, as applicable on the basis of height of the building.

19.12 External Facade

On the external facade of any building, the glazed surface area of the facade shall be non-reflective and provided up to a maximum of 50% of the total surface area of each facade, with the provision of safety railing up to sill level.

On the North facade, entire surface area may be glazed. 10 degrees deviation may be permitted in consideration of the Northern facade as illustrated.

4. 4 Display Structures

The size and location of permitted billboards along roads shall be permitted as prescribed in Section C Planning Regulations No. 6.9.

General Development Control Regulations

2. Every billboard shall be designed as per the requirements for structural safety as prescribed in Regulation No. 22.8
3. Billboards on roof tops are not permitted unless the entire roof is constructed with non-combustible materials

20 FIRE PREVENTION AND SAFETY**20.1 Requirement for Fire Safety Professionals in Buildings****20.1.1 Fire Protection Consultant on Record (FPCOR)**

FPCOR shall be necessary in all buildings listed in Schedule 21 and shall be responsible for a development as per Procedure Regulation No. 45.5. The minimum qualifications for Fire Protection Consultants shall be as listed in Schedule 7. Suitable persons shall be registered with the Chief Fire Officer.

20.1.2 Fire Officer

The minimum qualifications for Fire Officer shall be as listed in Schedule 24. Suitable persons shall be registered with the Chief Fire Officer.

20.1.3 Fire Men

The minimum qualifications for Fire Men shall be as listed in Schedule 24. Suitable persons shall be registered with the Chief Fire Officer.

20.1.4 Applicability of Fire Safety Professionals

The applicability of the fire safety professionals for buildings is provided in the table below on the basis of the height, use and area of the proposed building as applicable.

20.3 Marginal Open Space

For all buildings except Residential Dwelling and Dwelling-2, the marginal space adjacent to the building shall be open-to-sky and motorable with minimum load-bearing capacity as per table below:

No.	Building Height (meters)	Minimum Load Bearing Capacity (tonnage per sq.mts)
1	Less than 45mts	40
2	45mts and above	60

2. The entrance pass from the street shall not be less than limits in width.

20.4 Corridors and Passageway

For all buildings The minimum clear width of corridors and passageway shall be as under

Length of corridor (in mts.)	Width of corridor (meters)	
	Residential Dwelling-1 and Dwelling-2	Non-Residential Dwelling

Formulated Table

- Corridor shall be clear of any obstructions. No projection in any form shall be allowed up to a height of 2 cms. from floor level.
- In case of any level difference in a corridor a slope shall be provided with gradient not more than 1:2. In such case, guiding floor measure shall be provided.

20.5 Exit Requirements

20.5.1 General Exit Requirements for all buildings:

An exit may be a doorway, corridor, passageway(s) to an internal staircase, or external staircase, or to a veranda or terrace(s), which have access to the street, or to roof of a building or a refuge area. An exit may also include a horizontal exit leading to an adjoining building at the same level.

- Lifts and escalators shall not normally be considered as exits.
- For all occupiable buildings, every exit, entrance or exit discharge shall be continuously maintained free of any impediment for full use in the case of fire or other emergency.
- No building shall be so altered as to reduce the number, width or protection of less than that required.
- Exits shall be arranged that they may be reached without passing through another occupied unit.
- Fire doors with 1 hour fire resistance shall be provided at appropriate places along the escape route and particularly at the entrance to lift lobby and stairwell where a funnel or fire effect may be created, inducing an upward spread of fire and smoke.

General Development Control Regulations**20.5.1 Doorways for Special Buildings and Buildings with height more than 25mtr:**

Every exit doorway shall open into a staircase compartmented from rest of building or a horizontal exit of a corridor or passageway providing egress and protected means of egress.

2. No exit doorway shall be less than 1000 mm in width except assembly buildings where door width shall be not less than 2000 mm. All Doorways shall be not less than 2000 mm in height.
3. Exit doorways shall open outwards, that is, away from the room, but shall not obstruct the travel along any exit. No door, when opened, shall reduce the required width of stairway or landing to less than 900 mm. overhead or sliding doors shall not be installed.
4. In the case of building where there is a general corridor, the doors of rooms shall open outward and flush to the wall to permit smooth flow of traffic in the corridor.
5. Exit door shall not open immediately upon a flight of stairs. A landing equal to at least the width of the door (not less than 900mm) shall be provided in the stairway at each doorway. The level of landing shall be the same as that of floor which it serves. Manual door should incorporate kick plate 100 mm high to withstand impact of wheelchair footrest where doors are glazed. Door handle and lock should be positioned between 900-1000 mm from floor level.
6. Exit stairways shall be openable from the side, which they serve without the use of a key (panic bar).
7. Mirrors shall not be placed in exit doors to avoid confusion regarding the direction of exit.

**20.5.2 Horizontal Exits for Special Buildings and Buildings with height more than 25mtr:**

Horizontal exit may be a doorway, a corridor, a passageway to an internal or external staircase or to an adjoining building or to a semi-open or open space.

1. The width of horizontal exit shall be same as for the exit doorways.
2. A horizontal exit shall be equipped with at least one fire door of minimum two hour fire resistance or smoke-stop door of self closing type as illustrated in Performance Regulation No.20.5.2. Further it should have direct connectway to the fire escape staircase for evacuation.
3. Where there is a difference in level between connected areas for horizontal exits, ramps, not more than 1 in 10 gradient shall be provided; steps shall not be used.
4. Doors in horizontal exits shall be openable at all times from both sides.
5. Access to ramps from any floor shall be through a smoke-stop door.

20.6 Staircases**20.6.1 General Staircase Requirements for all Buildings:**

1. Staircase to abut an outer wall or be external part of the building with natural ventilation. All the space above the parapet wall shall be kept open for ventilation, but may be secured with grill.
2. All staircases shall be constructed of non-combustible throughout.

2. No windows shall be provided except in case of individual dwelling unit.
4. The treads shall be constructed and maintained to prevent slipping.
5. A staircase shall not be provided around a lift shaft unless provided with fire stop door of 1 hour rating at every floor level and no other openings in the hoist wall as illustrated across.
6. No gas piping, electrical panels or AC ducts shall be allowed in the stairway. However service shafts/ ducts (Lobby may be permitted). Electrical Shafts/ ducts shall have not less than 1 hour fire resistance. For other service shafts/ ducts, the fire resistance shall be not less than 1 hour.
7. All steps, edges must have a contrasting colour band of 50mm width stretched entirely across the step width for uses other than residential (Dwelling-1 and Dwelling-2 use).
8. Railing: Continuous handrail shall be provided on both sides including the wall (if any) at two levels: upper at 850mm-900mm and lower at 700mm to be measured from the base of the middle of the treads to the top of handrail. Floor-mounted railing or parapet shall be provided in such a way that the minimum required width of staircase does not reduce. The maximum gap between balusters shall be 150 mm.
9. Soffit (underside) open area under the stairs of the stairs and ramps should be enclosed or protected with rail or raised curb or marked with a tactile surface.
10. Headroom: The minimum headroom in a passage under the landing of a staircase and the staircase shall be 2.1 mtr from finished floor level.
11. No living space, store or other fire risk shall open directly into the staircase.
12. External exit door of staircase enclosure at ground level shall open directly to the open space.
13. The main and external staircases shall be continuous from ground floor to the terrace level.
14. Lifts shall not open in staircase.
15. Beams, columns and other building features shall not reduce the head room/width of the staircase.
16. Individual floors shall be prominently indicated on the wall facing the staircase.

Clear width of the stair case

20.4.2 Additional Staircases:

An additional staircase shall be required based on travel distance from the farthest point to the staircase on any floor. The provision of an additional staircase shall be subject to the requirements of travel distance being complied with as specified below:

No.	Building Use	Travel Distance (meters)
1	Residential (Dwelling-1 and Dwelling-2 Use)	30
2	Uses other than Residential (Dwelling & Industrial)	25
3	Industrial / High Hazard Use	20

20.6.3 Staircase for Buildings with height more than 25mts and up to 45mts:

1. Staircase shall be provided within a stairwell with a fire safe doorway of fire rating of 2 hours on each floor.
2. A common staircase connecting all floors above ground level shall not continue to the basement. A separate staircase shall be required for access to the basement. Common staircase may continue to the basement, if such a staircase opens into an enclosure at basement level with a fire rating of 2 hours with fire safe doorway.

**20.6.4 Staircase for Buildings with height more than 45mts:**

1. The width of the staircase shall not be less than 2 meters.
2. If the staircase is in the centre of the building and is not naturally ventilated, then a fire escape staircase has to be installed on either sides of the building as per Regulation No. 20.6.5 with travel distance as per respective building use and specified in Regulation No. 20.6.2. For such staircase with inadequate natural ventilation, any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.
3. For Buildings with height more than 45mts all staircases shall terminate at the ground floor level and the access to the basement shall be by a separate staircase.
4. Staircase shall be provided within a stairwell with a fire safe doorway of fire rating of 2 hours at every floor level.

20.6.5 Fire Escape Staircases:

External Fire Escape Staircase shall be provided for special buildings and buildings with height more than 45mts where the main staircase is located in the centre of the building and is without natural ventilation. Such fire escape staircase is to be installed on either sides of the building with travel distance as per respective building use and specified in Regulation No. 20.6.2. Such Fire Escape Staircases shall comply with the following:

1. Fire Escape Staircase to abut an outer wall or be external part of the building with natural ventilation.
2. External stairs shall have straight flight not less than 1250mm wide with 250mm treads and risers not more than 190mm. The number of risers shall be limited to 15 per flight.
3. No external staircase, used as a fire escape, shall be inclined at an angle greater than 45° from the horizontal.
4. The external staircase shall be constructed of non-combustible materials, and any doorway leading to it shall have the required fire resistance.
5. The route to the external stairs shall be free of obstructions at all time.
6. All external stairs shall be directly connected to the ground.
7. Handrails shall be of height not less than 700mm and not exceeding 850mm-900mm. There shall be provisions of balusters with maximum gap of 150mm.

20.7 Ramp

Access to ramps from any floor shall be through a smoke-stop door.

20.8 Lift**20.8.1 General Requirements of lift in buildings**

1. Walls of lift shaft enclosures shall have a fire rating of 2 hours. Lift shafts shall have a vent at the top of area not less than 0.5m² x 0.5m.
2. Lift motor room shall be located preferably at the top of the shaft and separated from the shaft by the floor of that room.
3. Landing doors in lift enclosures shall have fire resistance of not less than 1 hour.
4. The number of lifts in one row for a lift bank shall not exceed 4 and the total number of lifts in the bank (of two rows) shall not exceed 8. A wall of 2 hour fire rating shall separate individual shafts in a bank. Minimum distance of 10mcs shall be provided between two adjacent lift banks.
5. Lift car door shall have a fire resistance rating of half an hour. Lift car shall be ventilated from top.
6. Collapsible gates shall not be permitted for lifts. They shall have solid doors with fire resistance of at least 1 h.
7. If the lift shaft and lobby is in the core of the building, a positive pressure between 25 and 30 Pa shall be maintained in the lobby and a positive pressure of 30 Pa shall be maintained in the shaft. The mechanism for pressurisation shall act automatically with the fire alarm, shall be possible to operate this mechanically also.
8. Exit from the lift lobby, if located in the core of the building, shall be through a self-closing smoke stop door of half an hour fire resistance.
9. Grounding switch, at ground floor level, shall be provided on all the lifts to enable the fire service to ground the lifts.
10. Suitable arrangements such as providing slope in the floor of lift lobby shall be made to prevent water used during fire fighting act, from entering the lift shafts.
A sign shall be posted and maintained on every floor at or near the lift indicating that in case of fire, occupants shall use the stairs unless instructed otherwise. The sign shall also contain a plan for each floor showing the locations of the stairways.
11. Alternate source of power supply shall be provided for all the lifts through a manually operated changeover switch.
12. All lift shall be provided with calling hoach for rescue purpose.

**20.8.2 Lift for Buildings with height more than 15mcs:**

A lift connecting all floors above ground level shall not continue to the basement. A separate lift shall be required for access to the basement. If, however, common lifts are in connecting with basement, the lift lobby of the basement shall be pressurized, with self-closing door.

Lift in basement

Access

2m² or Equivalent for chimney shaft**20.8.3 Fire Lift**

Fire lift is required in the case of emergency for the exclusive use firemen to enable fire personnel to reach the upper floors with the minimum delay.

For Buildings with height more than 25mcs, one of the total required number of lifts as per Performance Regulation No. 19.17 shall have dedicated Fire lift.

General Development Control Regulations

2. For Buildings with height more than 45mcs-
 - a. all the required number of lifts as per Performance Regulation No. 9.12 shall be Fire Lifts with provision to ground in case of electrical failure and shall be provided with a panic button and a talk-back system.
 - b. The lift shall not be installed in the centre of the building and the lift shaft shall be ventilated from the top with smoke extractors. Unless, additionally, at least one fire lift shall be provided at the external edge of the building to be accessible externally by the fire-fighting staff.
 3. One fire lift per 1000 sq.mts of floor area shall be provided and shall be available for the exclusive use of the firemen in an emergency.
 4. In case of buildings with only two lifts, the second lift may be designated as a fire lift.
 5. Fire lift shall terminate at the ground level.
 6. It shall have loading capacity of not less than 545 KG (6 persons lift) with automatic closing doors of minimum 0.9m width.
 7. The electric supply shall be on a separate service from electric supply mains in a building and the cables run in a route safe from fire, that is, within the lift shaft. Lights and fans in the elevators having wooden panelling or sheet steel construction shall be operated on 24-volt supply.
 8. Fire lift should be provided with a ceiling hatch for use in case of emergency.
 9. In case of failure of normal electric supply it shall automatically change over to alternate supply. For apartment houses, this changeover of supply could be done through manually operated changeover switch. Alternatively the lift shall be so wired that in case of power failure, it comes down at the ground level and comes to stand-still with door open.
 10. The operation of fire lift should be by a simple toggle or two-button switch housed in glass-fronted box adjacent to the lift at the entrance level. When the switch is on landing call points will become inoperative and the lift will be on car control only or on a priority control device. When the switch is off, the lift can be used by the occupants in normal times.
 11. The words 'Fire Lift' shall be conspicuously displayed in fluorescent paint on the lift landing door at each floor level.
 12. The speed of the fire lift shall be such that it can reach the top floor from ground level within one minute.
 13. Telephones or other communication facilities shall be provided in lift cars. Communication system for lifts shall be connected to fire control room for the building.

20.4 Escape Lighting and Signages**20.4.1 Emergency Escape Lighting for Buildings with height more than 25mcs and Special Buildings**

The emergency escape lighting shall be provided to be put on when one second of the failure of the normal lighting supply and shall be of independent of main supply.

2. Such lighting shall be on separate circuits and be independently connected so that these can be operated by one switch installation on the ground floor easily accessible to fire fighting staff at any time irrespective of the position of the individual control of the light points, if any. It should be a miniature circuit breaker type of switch to avoid replacement of fuse in case of any crisis.
3. Escape lighting luminaires should be sited to cover the following locations:
 - a. At each exit door.
 - b. Near each staircase.
 - c. Near any other change of floor level.
 - d. Outside each fire exit and close to it.
 - e. Near each fire alarm call point.
 - f. Near firefighting equipment and.

2. To illuminate exit and safety signs as required by the enforcing authority.

For the purpose of this clause 'near' is normally considered to be within 2m measured horizontally.

4. Suitable arrangement shall be made by installing double throw switches to ensure that the lighting installed in the staircase and corridors does not get connected. Double throw switch shall be installed in the service room for minimizing the stand-by supply.
5. Staircase and corridor lighting shall also be connected to an alternative source of supply which may be provided by battery that is continuously trickle charged from the electric mains.
6. Emergency lighting systems shall be designed to ensure that a fault or failure in any one luminaire does not further reduce the effectiveness of the system.
7. The luminaires shall be mounted as low as possible but at least 2m above the floor level.
8. Sign are required at all exits, emergency exits and escape routes, which should comply with the graphic requirements of the relevant Indian standards.
9. Emergency lighting luminaires and their fitting shall be fire resistance type.
 - a. It is essential that the wiring and installation of the emergency lighting systems are of high quality so as to ensure their perfect serviceability at all times.
 - b. The emergency lighting system shall be capable of continuous operation for a minimum duration of 1 hour and 30 minutes even for smallest premises.
10. Illumination of exit. The floors of area covered for the means of exit shall be illuminated to values not less than 1 lux (10 lux) at floor level in auditoriums, theatres, concert halls and such other places of assembly. The illumination of floor exit stairs may be reduced during period of performances to value not less than 1/5 lux (1 lux).
11. The emergency lighting system shall be well maintained by periodical inspections and tests so as to ensure their perfect serviceability at all times.

20.9.2 Fire Exit Signages for Mercantile Buildings, Special Buildings and Buildings with height more than 25mtr:

1. All exit corridors and staircase shall have auto glow sign for people to escape in case of fires in darkness. Even the doors shall have guide marks guiding towards the staircase. The colour of the exit signs shall be green.
2. The exit sign with arrow indicating the way to the escape route shall be provided at a height of 1.8 m from the floor level on the wall and shall be illuminated by electric light connected to corridor circuits.
3. All exit way marking signs should be flush with the wall and so designed that no mechanical damage shall occur to them due to moving of furniture or other heavy equipments.
4. Further, at landings of floor shall have floor indicating the number of floor as per regulations. The floor indication board shall be placed on the wall immediately facing the flight of stairs and nearest to the landing. It shall be of size not less than 65cm x 30 cm.

20. 0 Fire Alarm System

Fire Alarm System with smoke detection alarm system shall be provided for all non-residential building having height more than 25mtr.

20.1 Smoke and Fire Venting

The provisions for smoke and fire venting for industrial buildings with large floor areas shall conform to regulations given in annex D, Part-III second revision.

The provisions for smoke and fire venting shall be provided for special buildings and for hotel and hospital building more than 25mtr height.

20.12 Electrical Services for all buildings

These shall conform to those given in C-12 Part 4 NBC, Second revision and the IS, 1644-1999 and particular attention is drawn to the following:

1. The electric distribution cable/wiring shall be laid in a separate duct. The duct shall be sealed at every floor with non-combustible materials having the same fire resistance as that of the duct. Low and medium voltage wiring running in shaft and in false ceiling shall run in separate conduits.
2. Separate circuits for firefighting pumps, lifts, staircases, corridor lighting and blowers for pressurizing system shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes, so that fire in one circuit will not affect the others. Such circuits shall be protected at origin by an automatic circuit breaker with its no-volt coil removed. Master switches controlling essential service circuits shall be clearly labeled.
3. An independent and well-ventilated electrical service room shall be provided on the ground level or first basement with direct access from outside or from the corridor for the purpose of termination of electric supply from the licensee service and alternative supply cables. The doors provided for the service room shall have fire resistance of not less than 2 hours.
4. If service room is located at the first basement, it should have automatic fire extinguishing system.
5. Suitable circuit breakers shall be provided at the appropriate points.
6. Electric supply for fire pump/fire lift should be provided separately and not get switched off along with the main supply of building.

20.13 Electrical Sub-station for all buildings

The sub-station shall have separate fire resisting walls/surroundings and shall necessarily be located at the periphery of the floor having separate access preferably from fire escape staircase. The outside walls, ceiling and floor including doors and windows to the substation area shall be of 2h fire rating.

1. A sub-station or a switch-station with oil filled equipment must not be located in the building.
2. The Sub-Station area needs to be maintained at negative air pressure and area in substation shall not be used as storage/dump area.
4. No transformer shall be allowed inside the building. When housed outside the building, the transformer shall be of premises by walls/doors/cut outs having fire resistance rating of 4h.

20.14 Emergency Power Supply for Buildings with height more than 15mts and Special Buildings

For every building having height more than 45mts, a stand-by electric generator shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, the stand-by fire pump, pressurization fans and blowers, smoke extraction and damper systems in case of failure of normal electric supply.

The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously. If the stand-by pump is driven by diesel engine, the generator supply need not be connected to the main electrical pump. Where parallel M.T.L.T supply from a separate sub-station is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with Authority.

20.15 Electric Supply and Installation for Buildings with height more than 25mts and Special Buildings

Electric supply to the High pressure Fire pump, Fire Lift and Sprinkler pump shall be supplied parallel to the building supply and should not get cut-off if the supply to the building is switched off.

2. All the electric wiring used shall be of 900 volt grading and connected to each enclosure through a MCB for particular load.

General Development Control Regulations

3. Electric cables/wires used shall be of 700 volt grading with Mechanical circuit breaker and earth leak Circuit Breaker (MCB and ELCB).

10.14 Lightning Arrestor for Buildings with height more than 25mts

The lightning protection for buildings shall be provided as given in Part 8-Building Services section 2 Electrical Installation NBC. Lightning arrestor shall be installed and properly earthed.

10.15 Service Ducts / Shafts for Buildings with height more than 25mts and Special Buildings

The Electrical ducts shall have not less than 2h fire resistance and for other services ducts, the fire resistance shall be not less than 1h. All such ducts shall be properly sealed and fire stopped at all floor levels.

2. A vent opening at the top of the service shaft shall be provided having between one-fourth and one-half of the area of the shaft.
3. Refuse chutes shall have opening at least 1m above roof level for venting purpose and they shall have an enclosure wall of non-combustible material with fire resistance of not less than 2 hours. They shall not be located within the staircase enclosure or service ducts or air-conditioning ducts. Inspection panel and doors shall be tight fitting with 1 hour fire resistance; the chutes should be as far away as possible from exits.

10.16 Ventilation for all Buildings

All enclosures should have openable windows and vents to be opened in case of fire or smoke accumulation.

2. If the floor or the building is generally air-conditioned, then a provision to stop the functioning of the air-handling unit should be provided and it shall be linked to a dampers and the same air duct should act as smoke extractors with the extraction fan running on automatically. If a fire or smoke is detected.

10.17 Air-conditioning

For buildings providing central air-conditioning, the specifications shall be in compliance with the following:

1. Escape routes like staircases, common corridors, lift lobbies, etc. shall not be used as return air passage.
2. The ducting shall be constructed of substantial gauge metal as per IS 435- 1963 Specification for Metal Air Ducts.
3. Whenever the ducts pass through firewalls or floors, the opening around the ducts shall be sealed with materials having fire resistance rating of the compartment.
4. The materials used for insulating the duct system (inside or outside) shall be of non-combustible material. Glass wool shall not be wrapped or secured by any material of combustible nature.
5. The air-handling units and the respective air ducts may be separate for each floor and in no way inter-connected with the ducting of any other floor.
6. If the air-handling unit serves more than one floor, the conditions given below shall be complied in addition to the recommendations above.
 - a. Proper arrangements be way of automatic fire dampers, working on fusible link/smoke detector principle for isolating all ducting at every floor from the main riser shall be made.
 - b. When the automatic fire alarm operates, the respective air-handling units of the air conditioning system shall automatically be switched off.
 - c. Where plenum is used for return air passage, ceiling and its fixtures shall be of non-combustible material.

General Development Control Regulations

20.20 Boiler and Boiler-room

The boiler shall be installed in a fire resisting room of 4th fire resistance rating, and the room shall be situated on the periphery of the building.

Foam inlets shall be provided on the external walls of the building near the ground level for use of fire services or use foam in case of fire.

- For Industrial Buildings, the Boiler rooms shall be in a separate room or protected by bundwalls at ground floor only.

20.21 Water Storage Tank

- For Building with height less than 25mts and building unit area above 750 sq. mts. an underground water tank of at least 50,000 litres capacity shall be provided which is accessible for fire fighting vehicles, and may be shared for building use. The covering slab shall be able to withstand the total vehicular load of 45 tons equally divided as a four point load when the slab forms a part of pathway/driveway.
- For Building with height more than 25mts& up to 40mts- an underground water tank of at least 1,00,000 (one lakh) litres capacity, exclusive for fire-fighting and accessible for fire fighting vehicles. The covering slab shall be able to withstand the total vehicular load of 45 tons equally divided as a four point load when the slab forms a part of pathway/driveway. 3. Requirement of water meter cum down-comer installation and capacity of fire pumps etc. shall be as per Table 23 part 4 NBC Second revision. The requirements regarding size of mainwires shall be as given in Table 24 part 4 NBC Second revision. The water meter shall be designed for zonal distribution ensuring that unduly high pressures are not developed in risers and hose pipes.

20.22 Fire Fighting System**20.22.1 Portable Fire Extinguishers**

Various types of fire extinguishers suitable for different classes of fires shall be provided in buildings. One unit of 5 kg Dry Chemical Powder (DCP), one unit of 4.5 kg of CO2 shall be provided for every 1000 sq.mts. of built-up area at each floor. This shall be required for residential buildings and Dwelling-2 buildings with height more than 5 mts and all non-residential buildings.

20.22.2 Automatic Sprinkler System

- For all non-residential dwelling buildings with height more than 15mts and up to 25mts without basement, dry riser shall be provided with fire service inlet at ground level.
- For all non-residential dwelling buildings with height more than 15mts and up to 25mts with basement of area more than 200sq.mts. automatic sprinkler system shall be required for the basement.
- For basements with area more than 200 sq.mts for buildings of all heights, automatic sprinkler system shall be required.
- For buildings with height more than 25mts& up to 40mts with parking in basement, automatic sprinkler system is necessary.
 - The entire building (each floor including the basement, ground and all higher floors) shall be sprinkled.
 - One sprinkler head 57 degree Celsius for every 10 sq. meters, only. A separate line for the sprinkler shall be installed and connected to the base of the terrace tank with shut-off valve and NRV.
 - The sprinkler system shall be fed from the underground tank with a separate pump and a sprinkler system installed with a gong valve (TTCO or similar type) and an Electrical flow switch for automatic operations.

General Development Control Regulations

- d. Furthest end of each floor shall have a drain valve for the system to be tested.
- e. The pump supplying water to the sprinkler system shall be of 1,50,000 liters capacity. River or downcomer for the sprinkler shall have hydrant valves and a fire service inlet to the main.

20.22.3 Internal Yard Hydrants, Hose Rack and Fire Service Inlet

At least two yard hydrant and one fire service inlet shall be provided. One hydrant outlet, one hose reel, one set of on/off switch for the fire pump and a set of extinguisher shall be placed inside the building for every 1000 sq.m floor area.

2. The system shall be with a 50mm internal dia. Riser with hydrant landing valves at each floor (Basement/ground/floor higher floors). An air vent valve at the top most level. The riser shall be of 'C' class pipes and welded to fire finish and coated with anti-corrosive paint and coloured RED. All hydrant valves used shall be of SS. The hydrant pipe shall also be connected to the bottom of the terrace tank with a NRV and a stop valve.

20.22.4 Ultra High-Pressure Fire Fighting System

1. The wet ultra high pressure system shall comprise of a ultra high pressure (wet plunger 50 lpm @ 100 bar) pump working at not more than 1000 rpm connected to an electric motor of 1000 rpm. Only feeding a 15mm SS. Pipe of seamless construction and joints shall be argon welded.
2. Each floor (Basement/ground/floor higher floors) shall have a 15mm dia. R-L hose with 40 lpm fog gun working at 100 bar pressure and be able to give a throw of 30 meters. There shall be a hose reel at each floor & shall be located at easily approachable place and shall be long enough to reach the extreme end of the floor.
3. The pump shall be fed by a 10,000 liters water tank containing clean drinking quality soft water. The high pressure pump along with the tank may be located at the ground / basement/terrace level there shall be appropriate vent in the pump. The discharge line at the pump shall be fitted with a pressure regulator and a high pressure by-pass valve to make the system safe.
4. A quick release adapter at the ground floor shall be installed where fire service vehicle can be connected to the high pressure system line.

20.22.5 Other Automatic Fire Extinguishing System

For requirements for other fire extinguishing systems like Automatic Medium-high Velocity Water Spray or emulsifying System, Fixed Foam Installations, CO₂ Extinguishing Systems and systems using Halon Alternatives, reference shall be made to sections 5 - A, 5 + 9, 5 + 10 and 5.3 of part 4 NBC, second revision draft as required for special risk.

20.22.6 Compartmentation for Buildings with height more than 45mtr

The building shall be suitably compartmentation so that fire/smoke remains confined to the area where fire incident has occurred and does not spread to the remaining part of the building.

2. All floors shall be compartmented with area not exceeding 750 sq.mtr by a separation wall with 2 h fire rating. For floors with sprinklers the area may be increased by 50 per cent.
3. In long buildings, the fire separation walls shall be at distances not exceeding 40mtr.
4. For departmental storerooms, shopping centers and basements, the area may be reduced to 500sq.mtr for compartmentation. Where this is not possible, the spacing of the sprinklers shall be suitably reduced.
5. When reducing the spacing of sprinklers, care should be taken to prevent spray from one sprinkler, impeding the performance of an adjacent sprinkler head.

20.23 Basement

These shall conform to those given in C-1 & Part 4 NBC second revision and particular attention is drawn to the following:

- The basement shall not open in to the staircase or lift well directly. The basements shall be provided with natural ventilation and more than one basement shall have mechanical smoke extraction installed with a capacity of one air change every 10 minutes.
- The staircase of basements shall be of enclosed type having fire resistance of not less than 2 hours and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such position that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storeys of the building. It shall communicate with basement through a lobby provided with fire resisting self closing doors of one hour resistance as illustrated in Performance Regulation No. 20. If the travel distance exceeds the cleared level, additional staircases shall be provided at proper places.
- Mechanical Ducted Extractors for smoke venting shall be designed to permit 6 air changes per hour in case of fire or distress call. For normal operations, air changes schedule shall be as given in part 6 NBC building services section 3.
- Discharge apparatus of all new or draft smoke vents shall be so arranged as to be readily accessible for opening by fire service personnel.
- Use of basement for kitchen shall not be permitted.

20.24 Refuge Area for Buildings with height more than 25 mts

Following provisions shall apply to refuge area in a building

- Refuge area shall be provided on the external walls/ periphery of the floor preferably on a cantilever projection, open to air at least on one side, protected with suitable railings and shall have direct access to fire ladder.
- Minimum area of 3sq.mts. on external wall with minimum width up to 1.2 mts at every 8mts height for floor area up to 1000 sq.mts.
- If floor area exceeds 1000sq.mts, another Refuge Area on another end of the floor shall be provided.
- For floors above 25mts and up to 40mts. One refuge area on the floor immediately above 25mts shall be provided.
- Residential Dwellings and Dwellings-2 Flts in multi-storied buildings with balcony need not be provided with refuge area, however flats without balcony shall be provided with refuge area as given above.

20.25 Materials**20.25.1 Materials for Interior of Building**

Only materials conforming to class 1 flame spread classification as per IS 12777-1989 shall be used. Materials which are combustible in nature and may spread toxic fumes/gases shall not be used for interior furnishings etc.

20.25.2 Materials for External Glazing

Glass of facade for building shall be of 1 hour fire resistance.

20.26 Fire Prevention and Safety Provisions during Construction

Adequate fire prevention and safety measures as published in the National Building Code of India, Part VII - Construction Processes and Safety, shall be provided in all buildings during construction in a manner that the Fire Protection Consultant on Record deems necessary.

20.27 Fire Safety of Existing Buildings

1. The Owner/developer/occupants shall have the assessment of fire safety system of an existing building/structure damaged/undamaged carried out at stipulated periodical intervals through expert(s) chosen from a panel of experts identified by the Competent Authority. The intervals for maintenance and inspection shall be as per Schedule 17.
2. The owner/developer/occupant in advice of such expert(s) shall carry out such repair/restoration and strengthening/retrofitting of the building found necessary so as to comply with the safety standards laid down in the national building code and the Indian standards as specified.
3. In case, the owner/developer/occupant does not carry out such action, the Competent Authority or any agency authorized by the competent authority may carry out such action at the cost of owner/developer/occupant.
4. The Competent Authority may direct the owner/developer/occupant, whether the building could be occupied or not during the period of compliance.

20.28 Classification of Buildings for Fire Prevention and Safety Provisions**20.28.1 Classification of Buildings**

The types of construction for industrial buildings according to fire resistance shall be classified in to four categories as per Table 1 given under 3.1.1 Part 4 NBC-second revision.

1. Type 1 construction- 4hr resistance
2. Type 2 construction- 2hr resistance
3. Type 3 construction- 2hr resistance
4. Type 4 construction- 4hr resistance

20.28.2 Fire Resistance Test

The Fire resistance test for structural elements shall be done in accordance with IS-3808: 1979.

20.28.3 Steel Framed Construction

Load bearing steel beams and columns of buildings having total covered area of 500 mt and above shall be protected against lateral collapse of structure in case of fire. This could be achieved by covering the exposed steel supporting members by suitable fire resistance rated material like concrete, vermiculite/hydrous silicate of Aluminium, Magnesium or Iron) etc as per IS-15 03 2002.

General Development Control Regulations**21 SPECIAL BUILDINGS PERFORMANCE REGULATIONS**

The following regulations shall be applicable for all Special Buildings in addition to the other performance regulations

21.1 Visibility

Auditorium or cinema halls shall provide minimum visibility requirements as per following specifications:

The seats nearest to the screen shall not be nearer than the effective width of the normal picture (ratio 1.33). This distance shall be 3/4 in case of cinema scope and other wide angles techniques and one half in case of 70mm presentations.

2. The elevation of the balcony seats shall be such that line of sight is not inclined more than 30° to the horizontal.
3. The seats should preferably be staggered side-ways in relation to those in front, so that a spectator in any row is not looking directly over the head of the person immediately in front of him.
4. The position and height of the screen shall be regulated in such a way that the maximum angle of the line of vision from the front seat to the top of the screen shall not exceed 50°.

21.2 Mixed Occupancy

1. Places of assembly in buildings of other occupancy, such as all rooms in hotels, restaurants in motels and assembly rooms in schools, shall be so located, separated or protected as to avoid any undue danger to the occupants of the place of assembly from a firehazard originating in the other occupancy. No mixed development shall be permitted with the buildings having height more than 40m. OR, Mercantile and residential (Residing-1 and Residing-2) use shall be separated by provision of shop floor/service floor.
2. Every place of assembly every tier of balcony and every individual room used as a place of assembly shall have exits sufficient to provide for the total capacity therein as required such that door width for assembly building shall not be less than 7000 mm for every 600 person.
3. Every place of assembly shall have at least four separate exits as remote from each other as practicable.
4. At least one row of seating area shall be made accessible by ramps or elevators for disabled visitors.
5. Clear aisles not less than 1.2m in width shall be formed at right angles to the line of seating in such number and manner that no seat shall be more than seven seats away from an aisle. Rows of seats opening to an aisle at one end only shall have not more than seven seats. Under the condition where at these aisles do not directly meet the exit doors, cross-aisles shall be provided parallel to the line of seating so as provide direct access to the exit, provided that not less than one cross-aisle for every 10 rows shall be required. The width of cross-aisles shall be minimum of 1 m. Steps shall not be placed in aisles to overcome differences in levels, unless gradient exceeds 1 in 10.
6. The facade of boxes, balconies and galleries shall have substantial railings not less than 900mm high above the floor. The railings at the end of aisles extending to the boxes shall be not less than 900 mm high for the width of the aisle or 1100mm high at the foot of steps.
7. Cross aisles except where the backs of seats on the front of the aisle project 600mm or more above the floor of the aisle shall be provided with railings not less than 900mm high.
8. No turnstiles or other devices to restrict the movement of persons shall be installed in any place of assembly in such a manner as to interfere in any way with the required exit facilities.
9. In theatres and similar places of public assembly where persons are admitted to the building at a time when seats are not available for them are allowed to wait in lobby or similar place until seats are available, such use of lobby or similar space shall not encroach upon the required clear width of exits. Such waiting shall be restricted to areas separated from the exit ways by substantial permanent partition or fixed rigid railing not less than 1050mm high. Exits shall be provided for such

General Development Control Regulations

writing spaces on the basis of 1 person for each 0.1m² of writing space/area. Such seats shall be in addition to seats specified for the main auditorium area and shall conform in construction and arrangement to the general rules of seats given above.

9. No display or exhibit shall be so installed or operated as to interfere in any way with access to any required exit, or with any required exit sign.
All displays or exhibits of combustible material or construction and all booths and temporary constructions in connection therewith shall be so located in combustibility or protected so as to avoid any undue hazard of fire which might endanger occupants before they have opportunity to use the available exits, as determined by the authority.
10. Means of assembly in buildings of other occupancy may use exits common to the place of assembly and the other occupancy provided the assembly area and the other occupancy are considered separately and each has exits sufficient to meet the requirements of the code.
11. Exits shall be sufficient for simultaneous occupancy of both the place of assembly and other parts of the building, unless authority determines that the simultaneous occupancy will not occur.
12. At least half the required means of exit shall lead directly outdoors or through exit ways completely separated from exits serving other parts of the building.
13. The decoration of places of assembly shall be of non-combustible materials. Fabrics and papers used for such purpose shall be treated with an effective flame retardant material. Stage settings made of combustible materials shall likewise be treated with fire retardant materials of class flame spread.
14. Seats in places of public assembly accommodating more than 300 persons, shall be securely fastened to the floor except as permitted in (a) below. All seats in balconies and galleries shall be securely fastened to the floor except that in raked-in enclosures the boxes with level floors and having not more than 4 seats, the seats need not be fastened. Temporary of the seats shall be fire resistance.
15. Chairs not secured to the floor may be permitted in restaurants, night clubs and other circumstances where fastening of seats to the floor may not be practicable, provided that in the area used for seating, excluding dance floor, stage etc. there shall be not more than one seat for each 1m² of floor area and adequate aisles to reach exits shall be maintained at all times.
16. Seats without dividing arms shall have their capacity determined by allowing 450 mm per person.
17. The spacing of rows of seats from back shall neither be less than 850 mm nor less than 700mm plus the width of the thickness of the back and the inclination of the back. There shall be a space of not less than 150mm between the back of one seat and the front of the seat immediately behind it as measured between plumb lines.
18. Rooms containing high-pressure boilers, refrigerating machinery other than domestic refrigerator type, or other service equipments subject to possible explosion shall not be located directly under or adjacent to required exits. All such rooms shall be effectively cut off from other parts of the building and provided with adequate vents to the water or
19. All rooms or areas used for storage of any combustible material or equipment, or for painting, refinishing, repair or similar purposes shall be effectively cut off from assembly areas or protected with a standard system of automatic sprinklers. They shall be located away from staircases.
20. Every stage equipped with fly galleries, grid work and rigging for movable theater type scenery shall have a system of automatic sprinklers over and under such stage areas or spaces and auxiliary spaces such as dressing rooms, store rooms and workshops. The projection opening shall be provided with a fire-resisting curtain, capable of withstanding a lateral pressure of 4 kN/m² over the entire area. The curtain shall have an emergency closing device capable of causing the curtain to close without the use of power and when so closed, it shall be reasonably tight against the passage of smoke.
21. The stage roof of every theatre using movable scenery or having a motion picture screen of highly combustible construction shall have a ventilator or ventilators in or above it, open able from the

General Development Control Regulations

stage floor by hand and also opening by fusible links or some other approved automatic heat/smoke actuated device, to give a free opening equal to at least one-eighth the area of the floor of the stage.

23. The proscenium wall of every theatre using movable scenery or decorations shall have exclusive of the proscenium opening, not more than two openings entering the stage, each not to exceed 2 m² and fitted with self-closing fire resistant doors.
24. Automatic smoke vents actuated by smoke detectors shall be installed above the auditorium or theatres, including motion picture houses, with capacity of 8 air change per hour.

21.3 Institutional Buildings

These shall conform to those given in 4.3 Part 4NBC second revision, and particular attention is drawn to the following:

1. In building or sections occupied by bed-ridden patients where the floor area is over 180 m² facilities shall be provided to move patients in hospital beds to the other side of a smoke barrier from any part of such building or section not directly served by approved horizontal exits or exits from first floor (floor 1) of a building to the outside.
2. Not less than two exits of one or more of the following types shall be provided for every floor including basements, of every building or section:
 - a. Doors leading directly outside the building,
 - b. Stairways
 - c. Ramps,
 - d. Horizontal Exits and
 - e. Fire Escape Staircase.
3. All required exits as per table in Performance Regulation No. 20 shall conform with
4. No building constructed in whole or in part of combustible materials shall be used to confine inmates in cells or sleeping quarters, unless automatic sprinkler protection is provided.

21.4 Public Safety

Closed Circuit Television (CCTV) Network shall be installed in public areas of assembly buildings and other places of entertainment as per protocol laid down by the Appropriate Authority.

22. STRUCTURAL SAFETY**22.1 Applicability**

The following structural and seismic safety regulations shall apply to all buildings.

22.2 Structural Stability and Maintenance of Existing Buildings

The Owner/ developer/ occupant and registered appointed Person on Record shall have the responsibility of structural safety of an existing building/structure damaged/damaged carried out at stipulated periodical intervals through expert(s) chosen from a panel of experts identified by the Competent Authority. The intervals for maintenance and inspection shall be as per Schedule - 7.

2. The owner/developer/occupant on advice of such expert(s) shall carry out such repair/restoration and strengthening/retrofitting of the building found necessary so as to comply with the safety standards laid down in the national building code and the Indian standards as specified.
3. In case, the owner/developer/occupant does not carry out such action, the Competent Authority or any agency authorized by the Competent Authority may carry out such action at the cost of owner/developer/occupant.
4. The Competent Authority shall specify the period within which such compliance is to be carried out.
5. The Competent Authority may also direct the owner/developer/occupant, whether the building could be occupied or not during the period of compliance.

22.3 Additions and Alterations to Existing Buildings

An alteration or addition to an existing building that is not structurally independent shall be designed and constructed such that the entire structure conforms to the structural and seismic safety requirements for new buildings, unless the following three conditions are complied with:

1. The alteration or addition complies with the requirements for new buildings.
2. The alteration or addition does not increase the seismic forces in any structural element of the existing building by more than 5% unless the capacity of the element subject to the increased force is still in compliance with the requirements for new buildings.
3. The alteration or addition does not decrease the seismic resistance of any structural element of the existing building unless the reduced resistance is equal to, or greater than, that required for new buildings.

22.4 Change of Use of Buildings or Part of a Building

When a change of use results in a structure being reclassified to a Higher Importance Factor (I_H) as defined in the IS - 893:2002 "Criteria for Earthquake Resistant Design of Structures (Fifth Revision)", the building shall conform to seismic requirements for a new building with the Higher Importance Factor.

22.5 Structural Safety Provisions during Construction

1. The quality of all materials and workmanship shall conform to accepted standards and Indian Standard Specifications and Codes as included in Part V Building Materials and Part VII Constructional Practices and Safety, National Building Code of India.
2. All borrow pits dug in the course of construction and repair of buildings, embankments, etc. shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly sloped for discharge into a river, stream, channel or drain and no person shall create any isolated borrow pit which is likely to cause accumulation of water that may breed mosquitoes.

General Development Control Regulations

3. Alternative materials, method of design and construction and tests: The provisions of the regulations are not intended to prevent the use of any material or method of design or construction not specifically prescribed in them provided any such alternative has been approved. Nothing of the provisions of these regulations is intended to prevent the adoption of architectural planning and layout conceived as an integrated development scheme, the competent authority may approve any such alternative if it conforms to the provisions of the relevant parts of the national building code, regarding material, design and construction, and the material, method, or work offered is, for the purpose intended, at least equivalent to that prescribed in these regulations in quality, strength, compatibility, effectiveness, fire and water resistance, durability and safety.
4. All buildings shall be constructed on quality control requirements.
5. In case of buildings under construction based on approved development permission structural safety requirements shall have to be observed. However due to such structural work of strengthening/reinforcing in the event of natural disaster if certain setbacks and margin get reduced, special permission may be granted by the Competent Authority on case to case basis.

22.6 Structural Safety Tests for Special Buildings

Whenever as per an opinion of panel experts there is insufficient evidence of compliance with the provisions of the regulations or evidence that any material or method of design or construction does not conform to the requirements of the regulations, in order to substantiate claims for alternative materials, design or methods of construction, the competent authority may require tests, sufficiently in advance, as proof of compliance. These tests shall be made by an approved agency at the expense of the owner as follows:

1. Test Methods: test methods shall be as specified by the regulations for the materials or design or construction in question, if there are no appropriate test methods specified in the regulations, the competent authority shall determine the test procedure, for methods or tests for building materials, reference shall be made to the relevant Indian standards as given in the national building code of India published by the bureau of Indian standards.
2. Test result to be preserved: copies of the result of all such tests shall be retained by the Competent Authority for not less than two years after the acceptance of the alternative material.
 - a. the testing of the materials as per Indian standards shall be carried out by laboratory approved by the competent authority on this behalf.
 - b. the laboratory/agency shall work out in consultation with the construction agency testing programme of materials such as cement, steel and quality of concrete including its curing, laying and strength as well as in the laboratory.
 - c. this should cover various stages of construction from foundation to completion at pernegation. the laboratory shall maintain a duly authenticated report in a bound register, copy of which will be submitted to the construction agency which will in turn forward the testing report to the competent authority.

22.7 Design for Structural and Seismic Safety**22.7.1 Design Standards**

The structural design of foundations, elements of masonry, timber, plain concrete, reinforced concrete, pre-stressed concrete and structural steel shall conform to:

1. The provisions of the National Building Code of India, Part VI Structural Design (Section - 1 Loads, Section - 2 Foundation, Section - 3 Wood, Section - 4 Masonry Section - 5 Concrete and Section - 6 Steel), and,
2. The following Indian Standards:

Structural Safety:

1. IS: 456-2000 "Code of Practice for Plain and Reinforced Concrete"
2. IS: 800- 984 "Code of Practice for General Construction in Steel"
3. IS 875 (Part 2)- 987 "Design loads (other than earthquake) for buildings and structures" Part 2 Imposed loads
4. IS 875 (Part 3): 987 "Design loads (other than earthquake) for buildings and structures" Part 3 Wind Loads
5. IS: 883- 966 "Code of Practice for Design of Structural Timber in Building"
6. IS: 904-1987 "Code of Practice for Structural Safety of Buildings Foundation"
7. IS:905- 987 "Code of Practice for Structural Safety of Buildings Masonry Walls"

Seismic Safety:

1. IS- 893- 2002 "Criteria for Earthquake Resistant Design of Structures (Fifth Revision)"
2. IS- 930- 993 "Ductile Detailing of Reinforced Concrete Structures subjected to Seismic Forces Code of Practice"
3. IS:4326- 993 "Earthquake Resistant Design and Construction of Buildings Code of Practice (Second Revision)"
4. IS:13828- 993 "Improving Earthquake Resistance of Low Strength Masonry Buildings- Guidelines"
5. IS:13827- 993 "Improving Earthquake Resistance of Earthen Buildings- Guidelines"
6. IS:13935-1993 "Repair and Seismic Strengthening of Buildings- Guidelines"
7. "Guidelines for Improving Earthquake Resistance of Buildings" by Expert Group, Government of India, Ministry of Urban Affairs & Employment, published by Building Materials and Technology Promotion Council, 1998

Cyclonic/ Wind Storms:

1. IS 875 (3): 987 "Code of Practice for Design Loads (other than Earthquake) for Buildings and Structures, Part 3, Wind Loads"
2. "Guidelines (based on IS 875- 3): 1987) for Improving the Cyclonic Resistance of Low-rise Houses and Other Building" by Expert Group, Government of India, Ministry of Urban Affairs & Employment, published by Building Materials and Technology Promotion Council, 1998

Note: Whenever an Indian Standard including those referred to in the National Building Code or the National Building Code is referred, the latest revision of the same shall be followed except specific criteria, if any, mentioned above against that Code.

22.7.3 Structural Inspection Report

A Structural Inspection Report (SIR) shall be prepared for all buildings specified in Schedule 17 and submitted as specified in Form No. 15

22.8 Structural Safety of Display Structures

Every display structure such as billboard shall be designed to ensure safety and be installed in compliance of National Building Code.

23 ENVIRONMENTAL MANAGEMENT**23.1 Minimum Distance from Water body**

Minimum clearance of 30mts shall be provided between the boundary of the ~~land~~ of a river where there is no embankment and any development work or part thereof.

2. Minimum clearance of 5mts to be provided between the embankment of a river and any building or part thereof or any other clearance as may be prescribed under any other general or specific orders of Government and appropriate Authority whichever is more.

3. Minimum clearance of 2mt shall be provided between the boundaries of any other waterbody such as lake (talav). Distance to be kept from canal shall be as follows:

Sr. No.	Type of Canal	Distance from Canal
1	Main Canal	25 m
2	Branch Canal/Sub Branch Canal	15 m
3	Intermediary Canal	10 m
4	Branch Minor	5 m
5	Sub Minor	0 m

4. Where a water course passes through a low lying land without any well defined bank, the applicant may be permitted by the Competent Authority to restrict or re-direct the water course to an alignment and cross-section determined by the Competent Authority.

23.2 Rain Water Management**23.2.1 Rain Water Disposal**

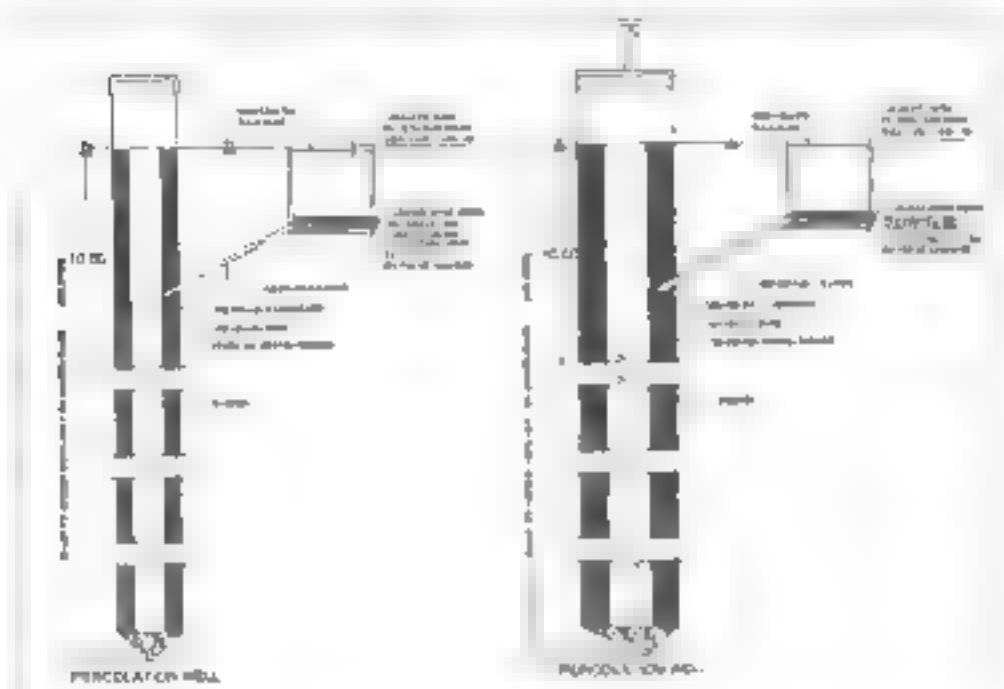

The roof (terrace) of a building and the remaining area of the building-unit shall be provided with an effective rain water drainage system so as to ensure that the rain water is not discharged into adjacent building units and no dampness is caused in any walls or foundations of adjacent buildings.

- Rain water pipes shall be allowed to the outside of the walls of the building or in recesses or formed in such walls or in such other manner as may be approved by the Competent Authority.
- No roof or terrace abutting on a public space shall be constructed without providing sufficient number of down take pipes and such pipes shall be so fixed as to discharge the rain water at a level not higher than 0.6 metre above the street level.
- The manner of channeling rain water discharge from a building-unit to a public storm water drain, if available, shall be determined by the Competent Authority.

23.2.2 Rain Water Harvesting

Rain water harvesting is mandatory for all buildings with ground coverage 80 sq.mts and above. The system of storm water drainage and storage in reservoirs and recharge should conform to one of the following specifications:

- a. For Buildings with ground coverage above 80 sq.mts and below 500sq.mts: Percolation Pit or Bore Recharge shall be provided in the marginal space around the building. Such pits shall be filled with small pebbles, brick paly or river sand and covered with perforated concrete slabs as illustrated below.

- b. For Buildings with building-unit area above 500sq.mts and up to 1500 sq.mts: Percolating Well with Rain Water Harvesting System shall be provided as illustrated below (up to ground first river):

General Development Control Regulations

- k. For Buildings with building-unit area above 100 sq.mts and up to 4000 sq.mts. Percolating Well with Rain Water Harvesting System shall be provided for every 4000sq.mts as illustrated above (up to ground second level).
- d. For Buildings with building-unit area above 4000 sq.mts One Percolating Well shall be provided as per Regulation No. 22.2.2.2. for every 4000sq.mts land area. As an alternative to providing multiple percolating wells, a Water Retention Pond with maximum capacity of 300,000 litres with a percolating well for every five percolating wells or part thereof shall be permitted as an alternative.

23.1.1 Rain Water Storage

For all building-units with area more than 4000sq.mts, Rain water storage tank shall be mandatory with adequate storage capacity.

23.3 Solid Waste Management

All buildings shall provide facilities for solid waste management. Standards and specifications of facilities shall conform to the following requirements:

23.3.1 Solid Waste Bin for Residential Dwelling-1 and Dwelling-2 Use

Community bin shall be provided in the road-side marginal open space.

2. The size of the bin container shall be calculated at the rate of 10 litres capacity per dwelling unit with a maximum size of bin of 80 litres. The numbers of bins shall be calculated on the basis of total no. of dwelling units/tenements.

23.3.2 Solid Waste Bin for Non-Residential Dwelling Use

1. Community bin shall be provided in the road-side marginal open space.
2. The size of the bin container shall be calculated at the rate of 20 litres capacity per 100sq.mts of floor area with a maximum size of bin of 80 litres.
3. The bin shall be provided with an air-tight lid.
4. For Hospitals, Hotels and Restaurants disposal of solid waste shall be carried out as per the norms decided by the Competent Authority from time to time.
5. For Clubs, Community Halls and Party Places, garbage container shall be provided with a minimum capacity of 4 tonnes. Such a container shall be placed along a paved area abutting the road of minimum dimensions of 6mt by 7.5mt. For such a place, used according to provision of shop

General Development Control Regulations

regulation, Competent Authority can collect security deposit from the plot owner as may be decided time to time.

23.4 Gray-water Recycling**23.4. Applicability**

Any owner applying for approval for construction of a new set of buildings of category and total built-up area mentioned below shall make provision for reuse of recycled water

No	Building Use	Built-up Area (sq.mts)
1	Hospitals and Nursing Homes	More than 5,000
2	Hospitality Hotels, Lodges, Guest houses	
3	Houses for Schools, Colleges, Training Centers	
4	Community Centers, Banquet Halls, and similar uses	
5	Mercantile Use	
6	All hazardous, water-polluting, chemical industries	

23.4.2 Provisions of Recycling System

The applicant shall along with his application submit the design, plant calculations and the references used for the calculations etc. to provide the system to recycle the gray water. Such system shall include the provisions to facilitate the following:

1. Treated gray water is pumped to a separate tank on the roof from where gray water will be supplied to water closets, garden taps, car washing taps etc.
2. Only water from water closets should be fed in to sewerage system.
3. Whenever arrangements for reuse of recycled water is provided additional arrangements for carrying the excess gray water to the sewerage system may also be provided.
4. In a nature or manner or in a way that shall not constitute a nuisance of foul gases or cause a public hazard or otherwise in compliance of these regulations.
5. The recycled water shall be used for non potable, non contact purposes within premises and shall not be connected to sewage/waste water system of local authority. However the waste generated by the recycle plant can be connected to local authority sewer network if it is of the accepted quality as mentioned in Regulation No. 18.4.3
6. Separation of gray water
 - a. The wastes from toilets in the premises will be separated from gray water that is of bathroom and kitchen wastes by means of separate down take discharge system.
 - b. The gray water shall be recycled by providing recycling plant and shall be reused for non-potable purposes after storing the same in distinctly separate tank by means of purple colored down take pipes.
 - c. The water quality shall conform to standards of non potable water. The recycled water shall be tested once in six months and results shall be made available to competent authority whenever demanded.
 - d. The make-up connection to the system will be done at the collection tank of the treated water through a free fall from Municipal water connection.
7. Separate plumbing for gray water
 - a. Every developer/owner shall provide the newly constructed building with the provision of down take plumbing for gray water recycling water plant, storage and reuse fitting before selling the building.
8. Reuse of water strictly for non-potable non-contact use.

General Development Control Regulations

- a. The reuse of water will be strictly for non-potable use by means of providing a dual/separate-reuse system coloured in purple. The non-contact uses shall be restricted to toilet flushing, drip irrigation of trees/shrubs, sub-surface irrigation of lawns and recharge of ground water.
- b. There shall not be cross-connection or tying of the potable and non-potable water at any point. The recycled water system shall be maintained at a lower operating pressure than that of the potable water system. Precautions should be taken to prevent cross-contamination.

23.4.3 Quality of Water and Treatment

1. The water generated after treatment should be safe for its use for flushing toilets, gardening etc.
2. The company or the agency engaged for installation of system for recycling of waste water shall preferably conform ISO 14000.
3. Provision may be made for checking the quality of recycled water with Water testing laboratory with Municipal Corporation or Water Supply and Sewerage Board.
4. The testing of wastes and the submission of the results shall be done in a manner in accordance with the terms and conditions prescribed by the Municipal Commissioner or Gujarat Pollution Control Board (GPCB) / Competent authority.

23.4.4 General Provisions

1. **Mandatory disclosure regarding changes:** An occupier of premises shall inform the competent authority of any change in the quality, nature or quantity of the wastes discharged from his plant or premises the manner of their discharge of waste immediately if the change is likely to cause discharge of water in violation or violation of license under these regulations.
2. **Corrective action:** In the event it is found any person violating the provisions of these regulations, the competent authority or Gujarat Pollution Control Board shall take notice and after enquiry and personal hearing take necessary corrective action.
3. **Dispute Resolution:** All the disputes arising in the enforcement of this by these rules shall be referred to Municipal Commissioner who in turn will resolve the disputes in advice with his authorized technical officer or any experts and intimate to the occupier / owner / developer. The decision of the Municipal Commissioner will be final and binding on the occupier.
4. **List of Authorized laboratories** shall be as authorized by Gujarat State Pollution Control Board or the Municipal corporation.
5. **Characteristics of effluent water quality** from the Grey Water Recycling plant shall be as approved by the Gujarat Pollution Control Board.

23.4.5 Enforcement of Regulations

In case of proposed/intending further redevelopment properties, the occupier/developer/owner will submit an application to the competent authority with details of proposed grey water reuse system along with the application for demand of water permission to connect the Grey Water/sewage to municipal sewage system.

2. **Conditional Waste Discharge Permission:** waste discharges of the conditional type plant will be allowed on the issue of a conditional permission provided the conditional type plant has recycling and reuse of water facility and not exceeding limits given as per GPCB norms.

23.5 Tree Plantation

1. All buildings shall provide tree plantations conforming to the following:
2. Building unit having area of more than 100sq.mts shall be provided with minimum three/trees for every 200sq.mts area or part thereof.
3. The Trees shall preferably be shade-giving and from the species listed in Schedule 24.

General Development Control Regulations

4. The requirement of trees shall be reduced on the basis of the number of grown existing trees that are conserved and not affected by the proposed development.
5. Trees shall be planted on site and guarded by the tree guards and shall be maintained properly.
6. Trees shall be planted without causing obstruction to the easy movement of fire fighting vehicles in case of fire emergency.
7. A person applying for permission to carry out any development shall have to pay tree plantation deposit along with his application to the Competent Authority at the rates decided by the Competent Authority time to time. This deposit shall be refundable after the period of five years with the condition that trees planted on the site shall be grown-up and maintained properly otherwise the deposit shall be forfeited and shall be utilized only for tree plantation and maintenance by the Competent Authority.
8. Competent Authority may consult Forest and Environment Department for tree typology, plantation and maintenance etc. if required.

22.4 Solar Water Heating System

All buildings in the following categories of buildings shall provide solar-assisted water heating system

No.	Building Use	Built-up Area
1	Bedded Hospitals and Nursing Homes	More than 2,000 sq.msq
2	Hotel/Resort/ House, Lodges, Guest Houses	
3	Hostels for Schools, Colleges, Training Centres	
4	Community Centre, Banquet Halls, and similar uses	
5	Independent Dwelling and Dwelling 2, bungalow and semi-detached dwelling units	More than 200 sq.msq of individual dwelling unit area

22.7 Energy Efficient Buildings

Any owner or developer constructs an Energy Efficient Building and produce a certificate from GRIHA (Green Rating for Integrated Habitat Assessment) or any other Government recognised institute showing the rating for the building. According to that rating certificate. The Competent Authority shall offer some incentives in the rate of charges of P5 for the energy efficient buildings (Green Building) as 5% discount in the total payable amount.

Owner shall have to apply prior to commencement of the project to GRIHA for the rating certificate and registration.

No. GHT/2016/12/NSA-102016/47 A - The following draft of a notification which is proposed to be issued under section 21 read with section 4A of the Gujarat Tax on Luxuries (Hotels and Lodging Houses) Act, 1977 (Guj. 24 of 1977), is published as required by sub-section (3) of the said section 21 of the said Act for the information of all persons likely to be affected hereby and notice is hereby given that the said draft of rules will be taken into consideration by the Government of Gujarat on or after the expiry of thirty days from the date of its publication in the *official gazette*.

2. Any objection or suggestion which may be received by the Secretary, Information and Broadcasting Department, Sachivalaya, Gandhinagar, from any person with respect to the said draft on or before the expiry of the aforesaid period will be considered by the Government.

Draft Notification

Gujarat Tax on Luxuries (Hotels and Lodging Houses) Act, 1977

No. GHT/2016/12/NSA-102016/47 A - In exercise of the powers conferred by section 21 read with section 4A of the Gujarat Tax on Luxuries (Hotels and Lodging Houses) Act, 1977 (Guj. 24 of 1977), the Government of Gujarat hereby makes the following rules further to amend the Gujarat Tax on Luxuries (Hotels and Lodging Houses) Rules, 1978, namely :-

1. These rules may be called the Gujarat Tax on Luxuries (Hotels and Lodging Houses) (Amendment) Rules, 2016.
2. In the Gujarat Tax on Luxuries (Hotels and Lodging Houses) Rules, 1978 (hereinafter referred to as "the said rules") for the rule 2A, the following shall be substituted, namely :-
2A. Registration of Hotels: (1) Every proprietor liable to pay Luxury Tax under the Act shall apply for Certificate of Registration in Form IB through the website of Commissioner of Entertainment Tax <http://cet.gujarat.gov.in> or any other website as may be prescribed by the Government from time to time to the Collector within thirty days from the date from which such proprietor commences to provide luxury to a person in the hotel.

Provided that proprietors who are already providing luxury on the date of the commencement of the Gujarat Tax on Luxuries (Hotels and Lodging Houses) Amendment Rules 2016, shall apply for Certificate of Registration in Form 1B through the website of Commissioner of Entertainment Tax (<http://cet.gujarat.gov.in>) to the Collector within thirty days from the date of commencement of the Gujarat Tax on Luxuries (Hotels and Lodging Houses) (Amendment) Rules, 2016.

2 Every such application for registration except covered under the proviso to sub-rule (1) above shall be accompanied by a fee of rupees five thousand to be paid online through the website of Commissioner of Entertainment Tax (<http://cet.gujarat.gov.in>) or any other website as may be prescribed by the Government from time to time.

3 In the said rules, in rule 2B, for sub-rule (1) the following shall be substituted, namely:-

"(1) On receipt of duly completed application under rule 2A, the Collector after making such inquiry as he deems fit and is satisfied that the applicant has complied with the provisions of the Act and Rules, shall issue a Certificate of Registration in Form 1C, not later than 30 days from the date of receipt of duly completed application."

(2) after sub-rule (2) the following shall be added, namely:-

"3 The Certificate of Registration issued shall be uploaded on website of Commissioner of Entertainment Tax (<http://cet.gujarat.gov.in>)

DRAFT NOTIFICATION

GUJARAT MOTORS VEHICLES TAX ACT, 1958

No. P1/2016, 39 MVD/02015/2394/KH In exercise of the powers conferred by the proviso to section 12B read with sub-section (1) of section 23 of the Gujarat Motor Vehicles Tax Act, 1958 (Bom. 65 of 1958), the Government of Gujarat hereby makes the following rules further to amend the Bombay Motor Vehicles Tax Rules, 1959 namely:-

These rules may be called the Bombay Motor Vehicle Tax (Gujarat Amendment) Rules, 2016.

2 In the Bombay Motor Vehicles Tax Rules, 1959, after rule 18 the following rule shall be inserted, namely:-

"18A. Manner of auction.-

(1) An officer of the Motor Vehicles Department shall immediately report in writing to the Taxation Authority under whose jurisdiction he is working regarding detention of vehicle by him under the section 12B of the Act, for which any Tax Penalty Interest due under this Act has not been paid.

(2) The Taxation Authority in whose jurisdiction the vehicle was detained, is not original Taxation Authority, shall immediately intimate to the original Taxation Authority about detention of vehicle. The original Taxation Authority shall inform the Taxation Authority in whose jurisdiction vehicle was detained with the details of Tax Penalty and Interest due and pending offences within 3 days from the receipt of such intimation.

Explanation:- For the purpose of these rules "Original Taxation Authority" means the authority in whose jurisdiction the detained vehicle is registered or the last change of address has occurred.

(3) The Taxation Authority in whose jurisdiction the Vehicle was detained, shall within 7 days from the receipt of the report on detention or receipt of the details of tax penalty and interest due and pending sentences from the original Taxation Authority, as the case may be, send demand notice for recovery of arrears of tax penalty and interest to the registered owner or person in possession or control of the vehicle in the effect that to pay the arrears of tax or to show the reason within 15 days from the receipt of the notice that why the detained vehicle should not be confiscated to the State Government for recovery of arrears of tax penalty and interest. The notice shall be sent through registered post addressed to direct service to ensure the delivery of notice.

(4) Where the notice is accompanied with the remarks of refusal it shall be deemed to be delivered. In case the notice will be returned with the postal remarks of either it is appeared that the address is registered or it is person in possession or control of the vehicle was not known, though was not known to be, the notice shall be published in the local daily news paper through the Department of Information and Broadcasting.

(5) On verifying the available record if it appears that the vehicle was purchased under hire purchase or lease agreement and the agreement has not been terminated the Taxation Authority may send the copy of the above stated notice to the financier mentioning therein that the motor vehicle tax due to be paid by the registered owner or a person in possession or control of the vehicle shall be the first charge on the vehicle as per section 24 of the Act and after recovery of the motor vehicles tax penalty and interest excess amount remaining if any may be paid to the financier subject to the authorized prior and report of the Chartered Accountant of the outstanding amount of loan.

(6) After receipt of the notice, registered owner or person in possession or control of the vehicle may submit his representation to the taxation authority. The Taxation Authority after taking into consideration the said representation, satisfied himself that the vehicle is required to be auctioned for the recovery of due tax penalty and interest shall pass an order of confiscation of the vehicle into the Government and conducting the auction of the vehicle mentioning therein the principal amount of due tax interest and penalty. If no representation is submitted then in that case the Taxation Authority may pass such order in ex-parte.

(7) Where motor vehicle is unfit for use or is in scrapped condition, the Taxation Authority shall cancel the registration of such vehicle. The Taxation authority also may destroy the engine and chassis number of such vehicle after cancellation of such registration number.

(8) The Taxation Authority may determine the upset price of the vehicle within 15 days from the order of confiscation and conducting the auction of the vehicle through following committee:

- (a) Assistant Regional Transport Officer or senior Motor Vehicle Inspector
- (b) Motor Vehicle Inspector or Assistant Motor Vehicle Inspector and

(c) Local officer recovery Deputy Mamlatdar/Circle Officer deputed for recovery of motor vehicle as tax and in absence of such recovery officer or Local recovery officer Deputy Mamlatdar or Circle Officer the local Deputy Mamlatdar or Mamlatdar of Collectorate or SDM office

Provided that it is the discretion of the committee to take report of a vehicle from surveyor or valuer approved by the Government for determination of the upset price of the vehicle from the panel constituted by the Taxation Authority on the recommendation of the committee. The Taxation Authority may pay appropriate fees for such report.

Provided further that on the recommendation of the committee the Taxation Authority may prepare a panel of minimum two vehicle surveyors or valuers approved by the Government at once by giving an advertisement in the local news paper inviting bids and fees for them. The Committee shall select vehicle surveyor or valuer approved by the Government on competitive rate. The panel name of the insurance company may also be considered as ready reference.

(9) The Taxation Authority shall publish the public notice through the Department of Information and Broadcasting into the news paper having large circulation on the public auction of the vehicle in accordance with upset price derived by the committee at where it is based whether the vehicle is in usable condition or in scrap condition. The following three stages shall be published in the public notice:

Stages	Date and Time
Observation of the actionable vehicle	Within seven day from the date of publication of advertisement during the office hour at the time fixed by the Taxation Authority
Submission of the bid in sealed cover	up to 5.00 PM of eighth day from the date of publication of advertisement at that day is public holiday notified by the State Government, than from the next working day
Opening of bids	Next day after the submission of bid at the time fixed by the taxation authority. If that day is public holiday not fixed by the State Government, than from the next working day
Issuance of order of seal of vehicle to successful purchaser	Preferably within three days from the date of opening of bid
Payment of price (offer amount)	Within three days from the receipt of order of seal of vehicle by auction to successful purchaser

Explanation: For the computation of time, date of publication of public notice of auction is included.

(10) Notwithstanding anything contained above, the Commissioner of Transport may issue instructions to the Taxation Authority or Taxation Authorities, for manner of conducting auction by any of using information technology, from time to time.

(11) The person who intends to take part in auction shall submit the offer alongwith self attested photo copy of PAN card, address proof, ADHAR,

Water ID in sealed cover in date and time specified in the public notice and demand draft of earnest money deposit. The earnest money deposit shall be the 10 percent of the upset price or Rs. 5,000/- whichever is more. The Sealed cover shall be produced with the demand draft of non-refundable fee of Rs. 500/-

(12) The Taxation Authority may take note of such sealed cover in the register as per the instructions of the Commissioner of Transport issued from time to time. The Commissioner of Transport may from time to time issue instructions to all the Taxation Authorities regarding the particulars require to be mentioned in sealed cover.

(13) The sealed cover received shall be opened before the Taxation Authority committee and all bidders. If any bidder shall not remain present, the decision of the auction shall be binding to him.

(14) After opening the sealed cover the person, who shall have offered the highest price more than upset price out of all bidders, shall be declared as the successful purchaser. Taxation Authority shall issue the order of sell of vehicle by auction to successful purchaser. The demand draft of earnest money deposit shall be returned to all unsuccessful bidders.

(15) The successful purchaser shall be liable to pay offered amount by demand draft within three days from the receipt of the order of sell of vehicle by auction which shall be adjusted against the amount of principal amount of tax first and thereafter it shall be adjusted against the penalty and interest accordingly.

Provided that where the successful bidder fails to pay the offer amount within such time his earnest money deposit shall be forfeited and deposited in the Government Treasury.

(16) After opening of the sealed cover if there are two or more than two bids for the same value, the Taxation Authority shall provide an opportunity to such bidders to submit new offers immediately.

(17) Where it appears that the quoted price is lower than the upset price then in that case the bid shall be liable to be cancelled. Where quoted price in bids of all participants shall be lower than the upset price the auction shall be cancelled, and the demand draft of earnest money deposit will be returned to all bidders and fresh auction process shall be undertaken by the Taxation Authority as per manner stated above.

(18) The Taxation Authority shall require the successful purchaser to take over the possession of vehicle within 7 days. The possession of vehicle shall be delivered to the successful bidder as on where basis. The successful bidder shall take the vehicle at his own cost.

(19) The Taxation Authority shall transfer the vehicle in the name of purchaser at the time of delivery of Motor Vehicle. If motor vehicle is road worthy condition.

(20) All the applicable taxes, duties or any other levy applicable after the date of taking delivery, the purchaser shall be responsible for all legal liabilities occurred after taking over the possession by auction.

(21) Where the auctioned price of successful purchaser is more than tax, penalty interest, the taxation authority may give opportunity to the registered owner or person who is in possession or control of the vehicle by registered post AD (RPAD) to receive such excess amount.

Provided that where such excess amount is not claimed within 30 days from the date of receipt of notification, it shall be deposited in the Government Treasury and no person shall have any right over that amount.

Provided further that where the vehicle is registered under the hypothecation agreement or lease agreement with financier and after auction it appears that the amount paid by the successful purchaser is excess than the outstanding amount of arrears of tax, penalty and interest, the Taxation Authority may intimate the financier in accordance with section 2C of the Gujarat Motor Vehicles Tax Act, 1958 to receive such excess amount within 30 days from the receipt of such letter after producing necessary proof. The Taxation Authority shall deposit such amount in Government Treasury if no financier come forward to receive such amount and no person shall have right over that amount.

Provided also that the Taxation Authority may give opportunity of being heard to the registered owner or person in possession or control of vehicle before remitting such amount to the financier.

(22) Where no person shall come forward to take part in second auction, the Taxation Authority shall send a report to the Commissioner of Transport and who may take appropriate decision for the disposal of vehicle by any other manner as he may deem fit.

(23) Where before or during the process of the auction if the Taxation Authority has reason to believe that the participants of auction are acting in a cartel or syndicate or for any other administrative reason in public interest, the Taxation Authority shall be empowered to cancel the auction at any stage without stating any reason. An order of cancellation of the auction shall be published on the notice board of the office. The Taxation Authority shall intimate to the Commissioner of Transport reasons of cancelling the auction and bid received, if any, shall be returned to the applicants after cancellation of auction.

(24) Where after auction it appears that the outstanding tax, penalty and interest are not recovered fully, the taxation authority shall have a right to recover such amount in accordance with the provisions of the Gujarat Motor Vehicles Tax Act, 1958.

(25) The Taxation Authority shall have right to cancel the auction at any stage without stating any reason.

6. PROCEDURE DURING CONSTRUCTION

6.1. Inspection of Construction

6.1.1 Inspection of Construction at Any Time

All buildings for which Development Permission is required are subject to inspection by the Competent Authority and the Competent Authority reserves the right to inspect such buildings at any time during the Period of Construction without giving prior notice of its intention to do so. Owner of the Building and any person undertaking construction shall Permit Permission authorised officers of the Competent Authority to enter the Building and inspect the building for the purpose of enforcing these Regulations.

6.1.2 Inspection where Development Permission is Granted

All buildings for which Development Permission has been granted shall be subject to periodic inspection by the Competent Authority during construction. It shall be the responsibility of the Owner, the Architect or Member of Engineer in Charge and the Clerk of Works on Record of the building to report commencement, progress at various stages and completion of construction to the Competent Authority as specified in Regulation No. 6.3.

6.1.3 Inspection for Fire Safety and Protection of Building under Construction

The buildings under construction shall be inspected by the Competent Authority at appropriate intervals to ensure that the fire safety measures and structures for all building under construction are adequate and operational. The Competent Authority shall also verify that all elevators including fire lifts are duly tested and their test certificate submitted to his satisfaction. If the above work is entrusted to a registered Fire Protection Consultant on Record, his reports shall be countersigned by the Chief Fire Officer.

In case of inadequacy of these Regulations, he shall issue a notice to the owner or occupier of such building directing him to rectify the shortcomings/contraventions within a specified period. Copies of all such notices shall be endorsed by the Competent Authority also.

6.2. Information to be Prominently Displayed on Site

It shall be the responsibility of the Clerk of Works on Record and the Owner to erect a notice board on the Building under construction displaying key information pertaining to the building. The notice board should be prominently visible, easily readable and should be located next to the primary access to the plot. The notice boards should be maintained for the entire Period of Construction up to issue or grant of Building the Permission. Failure to comply with this Regulation may result in revocation of the Development Permission. The information to be displayed is specified in Schedule 11.

6.3. Documents and Drawings to be Maintained on Site

It shall be the responsibility of the Clerk of Works on Record and the Owner of the building to keep all the documents and drawings listed in Schedule 12 on the site at all times after issuing Notice of Commencement of Construction to the Competent Authority up to the issue or grant of

Building Use Permission. These documents should be made available to any authorised officer of the Competent Authority inspecting the site for the purpose of enforcing these regulations during the period of construction of the Development Permission.

6.4 Reducing inconvenience and ensuring safety during construction

6.4.1 Stacking, Storing and Disposal of Building Material

It shall be the responsibility of the Clerk of Works on Record for the Building and the Owner or Developer to ensure that no building material, building equipment or building debris is stacked, stored, left or disposed off outside the building-unit for which Development Permission has been granted, on any public street or space.

It shall be the responsibility of the Architect on Record or Engineer on Record and Clerk of Works on Record to convince the Competent Authority of adequacy of additional barricading and safety measures that shall be taken to ensure public safety and reduce public inconvenience.

6.4.2 No Damage or Undue Inconvenience during Construction

It shall be the responsibility of the Clerk of Works on Record and the Owner or Developer to undertake all necessary measures to ensure that no damage is caused to adjoining properties due to construction. It shall also be the responsibility of the Clerk of Works on Record and the Owner or Developer to undertake all necessary measures to ensure that no undue inconvenience is caused to the public due to factors such as noise, dust, smell or vibrations.

It shall also be the responsibility of the Clerk of Works on Record and the Owner or Developer to undertake all necessary measures to ensure that traffic is not disrupted due to construction.

6.4.3 Liability for Ensuring Safety during Construction

The Owner or Developer and the Clerk of Works on Record shall be responsible for ensuring that all necessary measures for safety for all are taken on site. Grant of Development Permission, grant of building use Permission for part of a building or issuing of any instructions to ensure public safety or reduce inconvenience, does not render the Competent Authority liable for any injury, damage or loss whatsoever that may be caused to any one in or around the site during the Period of Construction.

6.5 Progress of Construction and Inspection Development Permission

6.5.1 Notice for Commencement of Construction

The Owner and the Architect on Record for the building shall notify the Competent Authority their intention to commence construction at least 7 working days prior to commencing construction by filing a Notice of Commencement of Construction, in the format prescribed in Form No. 10. Failure to notify the Competent Authority before commencing construction may result in lapse of the Development Permission.

A set of detailed working drawings including structural details based on approved building plans shall be submitted along with the Form in the case of individual residential buildings up to G+2 on a plot not more than 500 sq.mts in size. The Competent Authority shall not enforce, on request of the owner/developer, to submit such details.

The Notice of Progress of Construction shall not be necessary in the following cases:

- (i) Alteration in Building not involving the structural part of the building.

- iii) Extension of existing residential building on the ground floor up to maximum area of 40 sq.mts

In receipt of the Notice of Progress of Construction from the owner or developer, it shall be the duty of the Competent Authority, if found necessary, to check any deviation from the sanctioned plan and survey decision within 7 days to the owner or developer according to compliance.

6.5.2 Development Permission may Lapse if Construction Not Commenced on Time

If the Competent Authority is not informed of commencement of work on a proposed building within twelve months of grant of Development Permission, the Development Permission shall lapse. Application for revocation of Development Permission should be made within twelve months of grant of Development Permission. The extended period shall in no case exceed three years in the aggregate that is for a total period of four years.

Procedure for obtaining a Revoked Development Permission is specified in Regulation No

5.3

6.5.3 Competent Authority to be Notified of Progress of Construction

The Owner or Developer and the Architect or Builder or Engineer or Surveyor shall be responsible for notifying the Competent Authority of progress of construction having been completed up to the stages stipulated in Schedule 3. Notice of Progress of Construction shall be made in the format prescribed in Form No. 3, and approved by the Person in Charge.

6.6 RISK BASED CHECKS INSPECTIONS

The competent authority shall carry out the checking of the development project at application and the site inspection based on the consequence class specified.

6.6.1. consequence class.

Any development carried out by the owner or the developer attracts risk during the design and construction. Risk is defined, in the context of construction stages as the likelihood of non-compliance with building regulations and the potential extent of harm to human and built users of building and the environment associated with non-compliance. The competent authority can, based on the extent carry out inspections based on the consequences class.

6.6.2. Principles of Risk Categorization

The different Consequences Classes is specified Table 6.1 Principles of Risk Categorization (Definition of Consequence Class)

6.6.3 classification of the buildings & Control at the Design Stage (Design Supervision Levels, or DSL,

Based on the classification of the buildings specified in Table 6.2 the person in record (POR) shall carry out the design supervision and the checks as specified in Table 6.2 Control at the Design Stage (Design Supervision Levels, or DSL)

6.6.4. Design Supervision Levels, or DSL

The competent authority shall as carry out the inspection and other requirements as specified in Table 6.2 Control at the Design Stage (Design Supervision Levels, or DSL)

7 PROCEDURE FOR OBTAINING A BUILDING USE PERMISSION

7.1 Obtaining Building Use Permission

7.1.1 Notice of Completion of Construction and Building Use Permission

The Owner and the Architect on Record for the building shall be responsible for notifying the Competent Authority of completion of construction and for certifying that the construction complies with the sanctioned design and specifications. Notice of Completion of Construction and Compliance Certification shall be made in the format prescribed in Form No. 42 and shall be accompanied by documents and drawings as prescribed by the Competent Authority in Schedule 14. The format for submission of drawings, specifications and documents is specified in Schedule 5.

Subsequent to notifying the Competent Authority about the completion of construction in compliance to the regulations, application for Building Use Permission may be made to the Competent Authority in the format prescribed in Form No. 43.

7.1.2 Fees

Building Use Permission fees shall be determined by the Competent Authority and are listed in Schedule 5. It shall be the responsibility of the Owner to deposit Building Use Permission Fee with the Competent Authority along with the application for obtaining a Building Use Permission.

7.1.3 Final Inspection

Following the receipt of the application for Building Use Permission and the Notice of Completion of Construction from the Competent Authority, the competent authorities of concerned jurisdiction for ensuring compliance to sanctioned design specifications and other aspects of the building are as per Schedule 12. The Competent Authority shall conduct the inspection within 21 days of receipt of Notice of Completion of Construction.

If on inspection, the Competent Authority is satisfied that the construction of the building complies with the sanctioned design and specifications, it shall grant a Building Use Permission.

If the construction is found not to comply with sanctioned design and specifications, the Competent Authority shall communicate queries regarding the construction and/or directions to ensure compliance to the Owner and the Architect on Record or Engineer on Record. Failure to comply with directions as may be issued by the Competent Authority may result in revocation of the Development Permission. The Architect on Record or Engineer on Record shall respond to queries and notify the Competent Authority of having undertaken compliant modifications.

7.1.4 Grant / Refusal of Building Use Permission

The final inspection of the work and communication of the decision about the grant of the Building Use Permission shall be made by the concerned Competent Authority within 21 days from the date of receipt of Notice of Completion of Construction and Compliance Certification. If the Competent Authority is satisfied that the construction of the building complies with the sanctioned design and specifications and other requirements as per Schedule 12, it shall grant a Building Use Permission in the format stipulated in Form No. 44. Reasons for grant/refusal of Building Use Permission shall be communicated to the applicant.

In cases where the building construction is as per regulations but the Owner of the adjoining Building or Chairman/Secretary of the Cooperative Society are not giving consent at the time of Building Use permission, the Competent Authority may issue permission after giving opportunity

of hearing to the Owner of the adjoining Building or Chairman/Secretary of the Cooperative Society considering the merits and demerits of individual case.

7.1.5 Penalties

Penalties for not complying with Regulations No. 7.1 are stipulated in Schedule 16.

7. Obtaining Permission to Change Sanctioned Use of Building

7.2.1 Application

Application for obtaining Permission to Change Sanctioned Use of Building shall be made by the Owner for which a change in use is proposed and the Persons on Record, in the format prescribed in Form No. 13.

7.2.2 Drawings, Specifications and Documents

Drawings, specifications and documents to be submitted along with Application for Permission to Change Sanctioned Use of Building are listed in Schedule 14. The format for submission of

7.2.3 Fees

Fees and other charges for obtaining Permission to Change Sanctioned Use of Building are listed in Schedule 15.

7.2.4 Scrutiny of Application

The Competent Authority shall undertake scrutiny of the Application to Change Sanctioned Use of Building. Areas of compliance with Development Regulations and/or queries pertaining to the application shall be communicated. An opinion of the Competent Authority shall be given in the application and responses to queries shall be communicated.

7.2.5 Grant / Refusal of Permission to Change Sanctioned Use of Building

DEPARTMENT OF SCIENCE & TECHNOLOGY

Notification

Sachivalaya, Gandhinagar, 21st June, 2016.

Gujarat Essential Services Maintenance Act, 1972.

No. GST/06.2016/GSW/112016/ESMA/IT Whereas, the Government of Gujarat is of the opinion that strike in all employment in relation to the working of State Data Centre or the working of Gujarat State Wide Area Network would pre-judicially affect the maintenance of both internet as well as the internet services at various offices under the Government of Gujarat, and would in turn pre-judicially affect or disrupt the access to various e-governance applications which provide services to the citizens and which facilitate transacting of Government business, and that such a strike would in turn result in grave hardship to the community and citizens of the State for lack of access to the service delivery infrastructure from the State Government,

Now therefore in exercise of the powers conferred by sub-clause (i) of clause (a) of sub-section (1) of section 2 of the Gujarat Essential Services Maintenance Act, 1972 (the Gujarat 23 of 1972), the Government of Gujarat hereby declares all employment whether direct or contractual, or as a representative of an outsource agency to whom service responsibilities have been outsourced in the State Data Centre as well as in relation to the functioning operation and maintenance of the Gujarat State Wide Area Network (GSWAN), to be an essential service for purposes of the said Act.

By order and in the name of Governor of Gujarat

HITESH PATEL,
Under Secretary to Government.

ઉર્જા અને પેટ્રોકેમિકલ્સ વિભાગ

જાહેરનામું

સચિવાલય, નાણીનગર, તા.:- ૪થી ઓગસ્ટ, ૨૦૧૬

ભાગ : અયુ-૨૦૧૬-૪૫-અપીલી-૧૧-૨૦૧૫-૩૨૩૦-ઈ-ભાગ, - અર્થે ગુજરાત સરકારને ગુજરાત પાણીની અને ગ્રેસની પાઈપલાઈન (જમીનમાં વપરાશકારીને હક્ક સંપાદિત કરવા બાબત) અધિનિયમ - ૨૦૦૦ ની કલમ ૩ ની પેટા કલમ (૧) થી પ્રાપ્ત થયેલ સત્તા અન્વયે ગુજરાત સરકારને ઉર્જા અને પેટ્રોકેમિકલ્સ વિભાગના જાહેરનામ ક્રમ ૬ અયુ-૨૦૧૬-૪-અપીલી-૧૧-૨૦૧૫-૩૨૩૦ ઈ. તારીખ ૨૦ જાન્યુઆરી-૨૦૧૬ થી તે સુધી જાહેર અનુમુલિયમ વર્ણન કરેલ જમીનમાં ગુજરાતી ગ્રેસ પરીપત્રન માટે પાઈપલાઈન નાખવાનું હેતુ માટે જમીનના વપરાશકારીને હક્ક સંપાદિત કરવાનો ઈરે હા જાહેર કરેલ છે.

આ જાહેરનામ સુપ્રસિદ્ધ થયેલ જાહેરનામાની વિગતો સમાવ્ય જનતાને તારીખ ૦૫.૦૪.૨૦૧૬ ના રોજ ઉપલબ્ધ કરવામાં આવી હતી, અને આ સુધી હવે સક્ષમ સત્તાધિકારીએ કલમ ૬ ની પેટાકલમ ૧ હેઠળ ગુજરાત સરકારને દરખાસ્ત તૃપ્ત કરેલી છે.

અને આથી, હવે રાજ્ય સરકારે વિચારણા અને જાહેરનામ સુધી જાહેર અનુમુલિયમ વર્ણન કરેલી જમીનોમાં ગ્રેસ પાઈપલાઈન નાખવા માટે વપરાશકારીને હક્ક સંપાદિત કરવાનું જરૂરી જણાય છે.

અને કલમ ૬ ની પેટા કલમ ૪ અન્વયેની સત્તા હેઠળ રાજ્ય સરકારે આદેશ કરેલ છે કે આ જમીનો રાજ્ય સરકારને મિલિત થવાને બદલે ગુજરાત સ્ટેટ પેટ્રોનેટ લિમિટેડ, (ગુજરાત સરકારના સહન ગુજરાત સ્ટેટ પેટ્રોલિયમ કોર્પોરેશન લિમિટેડની ગોણ કંપની) નાધીનકરને કોઈપણ જાતના બોજા રહિત આ જાહેરનામુ સુપ્રસિદ્ધ થાય તે તારીખ થી પ્રાપ્ત થશે.

(૧) જોડાણ ખાતે ખેતીવાડી ઉત્પાદન બજાર મહસુલો સહ માર્કેટ પાસે સન ૧, ૬૨થી કાયદેસર છે અને આ સ્થળે બજાર સમિતિ ઘાટની તમામ પ્રકારની સુવિધાઓ પ્રલબ્ધ છે.

(૨) ગુજરાતમાં ખેતપદાર્થો માટે વિવિધ આધુનિક ટેકનોલોજીઓ ઉપયોગ કરીને ખેત ઉત્પાદન કરી ખેડૂતોને સ્પર્ધી પ્રતિષ્ઠા કરી છે જેના કારણે કૃષિ ઉત્પાદન સહ જ વધવા પામલ છે.

(૩) ખેડૂતોને જેમ બની શકે તેમ તેમની નજીક બજારની સુવિધા પુરી પાડવી ન જોડાણના ખેડૂતાના વિશાળ ક્ષેત્રમાં છે અને તે સરકારની ફરજ અને છે.

(૪) રાજ્ય સરકારનો સામાન્ય અભિગમ એવો છે કે દરેક તાલુકા દીક બજાર સમિતિ હોવી જોઈએ જેથી તાલુકાના ખેડૂતો તેમનું ખેત ઉત્પાદન જવુ કે, અનાજ, શાકભાજી અને ફળફળાદી વગેરે સમયસર બજાર મળે પહોંચાડી શકે અને તેથી તેમના ખેત ઉત્પાદનનું ધોરણમ મૂલ્ય મેળવી શકે.

(૫) અધિનિયમની કલમ-૫૨ તથા કલમ-૫ થી મળેલ સત્તાની રૂબરૂ તથા ૨૦૧૧-૨૦૧૪ના રાજ જાહેરનામું પ્રશિક્ષ કરેલ જેના અનુસારના વાણિજ્યનો મર્યાદવામાં આવેલ ત્યારે જાહેરાત તાલુકાના ૨૧ ગ્રામ પંચાયતો અને ૮૯ વિવિધ ગ્રામજનોએ જાહેરાત તાલુકામાં અલગ બજાર સમિતિ બનવી જરૂર તરીકે રજૂઆત કરી હતી હતી.

આ કિસ્સાત જયારે વાણિજ્યસૂચક મર્યાદવામાં આવ્યા ત્યારે ૧૩ વિવિધ પ્રકારની સહકારી મહસાણા અને વિવિધ ગામોના ૮૫ જટલા વ્યક્તિએ જાહેરાત તાલુકામાં અલગ બજાર સમિતિની વિરૂદ્ધ રજૂઆત કરેલ છે.

આમ સમગ્ર રજૂઆતોને જોતા જાહેરાત તાલુકાના મહા ભાગના ગામો સહકારી સંસ્થાઓ અને વ્યક્તિઓ અલગ બજાર સમિતિની પ્રાગણી કરેલ છે.

આવા સંજોગોમાં જાહેરાત તાલુકાની અલગ બજાર સમિતિની રચના કરવી જરૂરી હોઈ મહસાણાની ખેતીવાડી ક્ષેત્રના બજાર સમિતિનું વિભાજન કરી ખતીવાડી ક્ષેત્રના બજાર સમિતિ જાહેરાતની રચના કરવાના નિર્ણય ઉચિત જણાય છે કારણકે પૂર્વકની વિચારણા આ પછી સુચિત વિભાજન કરવું જરૂરી અને ધાર્ય જણાય છે.

તેથી, હવે ખેત ક્ષેત્રના બજાર અધિનિયમ ૧૯૬૩ની કલમ ૫૨ અને કલમ ૫ સાથે રાજ્યના મળેલ સત્તાની રૂબરૂ મુજબ સરકાર, મહસાણા ખતીવાડી ક્ષેત્રના બજાર સમિતિ મહસાણાનું વિભાજન કરી મહસાણા તાલુકાની અલગ બજાર સમિતિની રચના કરે છે.

આ કુલમ અમલ પી એન ૨૩૦-૨૦૧૪ ઈન સ્પેશી એન્ડ ૫૪૪-૨૦૧૪ના નામદાર ઈન્ડિકેટરના આદેશ મુજબ, આ કુલમની અમલવારી નામદાર ઈન્ડિકેટરની વિચારણા તથા નામદાર ઈન્ડિકેટરના કુલમ થવા બાદ અમલવારી કરવાની રહેશે.

મુદ્દા નં (૧) ખેતીવાડી ઉત્પન્ન બજાર સમિતિ ઉમરાળા, મુ. ધોળા, તા ઉમરાળા, જિ ભાવનગરની સાધારણ સભાની બેઠક તા ૧૩/૫/૨૦૧૬ ના રોજ ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-ઉમરાળા, મુ. ધોળા, તા ઉમરાળાની કચેરીએ અગાઉથી નિયત થયેલ તા ૫/૫/૨૦૧૬ના એજન્ડાની વિગતેના મુદ્દાઓ અન્વયેની કાર્યવાહી અર્થે બોલ ચલાવ્યા અંગે વેલ હતી જેમાં બજાર સમિતિ ઉમરાળામાં નિયુક્ત થયેલ કુલ ૧૭ (તમામ) સમિતિના સભ્યો હાજર રહેલ હતા. સાધારણ સભામાં હાજર રહેલ સમિતિના સભ્યો પાસે બોર્ડના કરાવ નં.૦૭ થી બજાર સમિતિ ઉમરાળાનું સને ૨૦૧૫-૧૬ના વર્ષનું પુરવાણું અદાજપત્ર અને સને. ૨૦૧૬-૧૭ના વર્ષનું અદાજપત્ર રજુ કરી મંજૂર થયા અર્થે રજુ કરવામાં આવેલ હતું. પરંતુ હાજર રહેલ સમિતિના કુલ ૧૭ સભ્યોમાંથી ૦૬ સભ્યોએ બહુમતિથી કરાવ પસાર કરી બજાર સમિતિ ઉમરાળાનું સને ૨૦૧૫-૧૬ના વર્ષનું પુરવાણું અદાજપત્ર અને સને ૨૦૧૬-૧૭ના વર્ષનું અદાજપત્ર બહુમતિથી નામંજૂર કરેલ છે. જેથી બજાર સમિતિ-ઉમરાળાનું ઉક્ત વિગતે સને ૨૦૧૫-૧૬ના વર્ષનું પુરવાણું અદાજપત્ર અને સને ૨૦૧૬-૧૭ના વર્ષનું અદાજપત્ર મંજૂર થયેલ ન હોય, બજાર સમિતિ ઉમરાળાની સમિતિના સભ્યો ઉક્ત વિગતે બજેટ નામંજૂર થતા બજાર સમિતિ-ઉમરાળાના વિકાસ અંગેની કોઈ કાર્યવાહી કરી શકે તેમ નથી કે નિયત થયેલ કરજ બજાવવા સક્ષમ નથી ખેતીવાડી ઉત્પન્ન બજાર સમિતિ ઉમરાળાના સભ્યો જરા નીચે મુજબની વિગતો જવાબો રજુ કરેલ છે.

જવાબ: ચેરમેનશ્રી, ખેતીવાડી ઉત્પન્ન બજાર સમિતિ-ઉમરાળા કારણ તા ૫/૫/૨૦૧૬ ના રોજ એજન્ડા ઇસ્યુ કરી તા ૧૩/૫/૨૦૧૬ ના રોજ સાધારણ સભાની બેઠક બોલાવેલ હતી જેમાં સુદ થેલ સભ્યો અને પ્રતિનિધિયુક્ત થયેલ સભ્યો સહિત તમામ (૧૭ સભ્યો) ને એજન્ડા બજાવેલ હતો. જેના કારણે તમામ (૧૭ સભ્યો) હાજર હતા. આ બેઠકમાં કરાવ-૬ થી કુલ ૧૭ સભ્યો પેકી ૯ સભ્યોએ અદાજપત્ર મંજૂર ન કરવા જણાવતા અદાજપત્ર મંજૂર થયેલ નથી પરંતુ ગુજરાતના ખેતીવાડી ઉત્પન્ન બજારો બાબતના નિયમો ૧૯૬૫ ના નિયમ ૩૫ (૭) મુજબ સચાલક અથવા આ અર્થે તેણે અધિકૃત કરેલ કોઈપણ શખ્સ બજાર સમિતિની કોઈ પણ સભામાં હાજર રહેવાને હક્કદાર રહેશે પરંતુ તેઓને મત આપવાનો અધિકાર રહેશે નહીં દરેક સભા બોલ ચલાવી નોટીસની નકલ સચાલકને અથવા આ અર્થે તેણે અધિકૃત કરેલ કોઈ પણ શખ્સને મોકલવી તેવી જોગવાઈ છે તેમ છતાં સરકારી પ્રતિનિધિયુક્ત બન્ને કર્મચારીઓએ મતદાન કરેલ છે તે આ જોગવાઈ વિરૂદ્ધ હોય તે મતદાન દબાવે તેવામાં ન આવે તો અદાજપત્ર ના -મંજૂર કરવા તરફી જે નવ મત ગણવામાં આવે છે તે સાત મત રહેવા પામે અને અદાજપત્ર મંજૂર કરવા તરફી આઠ મત પડેલ છે. આમ અદાજ પત્ર આઠ વિરૂદ્ધ સાત મતે મંજૂર થયેલ ગણવા પાત્ર છે. આમ, અ હકિકત જોતાં અદાજપત્ર ના -મંજૂર ગણવા પાત્ર રહેતું ન હોય તેથી આપવામાં આવેલ કારણદર્શક નોટીસ કાંઈકે કરવા વિનંતી છે અદાજપત્ર ના-મંજૂર થતા અમો બજાર સમિતિના વિકાસ અંગેની કોઈ કાર્યવાહી કરી શકીએ તેમ નથી હોવા મનાવાને કારણ રહેતું નથી કારણ કે અદાજપત્ર ના-મંજૂર કરનાર ૯ સભ્યોએ અદાજપત્ર ના-મંજૂર કરવા કથા કારણોસર મતદાન કરેલ છે? તે કોઈ કારણ દર્શાવેલ નથી હકત અદાજપત્ર ના-મંજૂર કરવા તરફી ૯ સભ્યોએ મતદાન કરેલ છે તે પણ ગુજરાતના ખેતીવાડી ઉત્પન્ન બજારો બાબતના નિયમો ૧૯૬૫ ના નિયમ ૩૫(૭) મુજબ સચાલક અથવા આ અર્થે તેણે અધિકૃત કરેલ કોઈપણ શખ્સને મત આપવાનો અધિકાર રહેશે નહિ. તેમ છતાં તેઓએ મતદાન કરી અદાજપત્ર ના-મંજૂર કરેલ છે.

અને તેથી આપવામાં આવેલ કારણદર્શક નોટીસ રદ કરી કાંઈકે કરવા પાત્ર છે આથી કારણદર્શક નોટીસ કાંઈકે કરવા વિનંતી છે. તેમજ અદાજપત્ર ના-મંજૂર થવાના કારણે સૂચાવેલી બોડીને તેમના હોદ્દા ઉપરથી દૂર કરવા

જાન્યવારના કે નિયમોના કોઈ જોગવાઈ નથી તેમ જતા આવા કારણોસર ચૂટ.ચેલી બોડીને દૂર કરવા બજારધારાની કલમ ૪૬(૧) હેઠળ આપવામાં આવેલ કારણદર્શક નોટીસ રદ કરી ફાઈલે કરવા પાત્ર છે કારણ કે અંદાજપત્રને અ.મ.મી વર્ષનું આયોજન દર્શાવતી માહિતી છે અને તેમાં પણ મંજૂર થયેલ અંદાજપત્ર ઉપર ત કોઈ વધારાના નવ કામ કરવા ધારણા હોય તો પુરવણી અંદાજપત્ર પણ રજુ કરી મંજૂર કરાવી શકાય છે તે રીતે ના મંજૂર થયેલ અંદાજપત્ર પણ અમો બીજી સાધારણ સભામાં રજુ કરી મંજૂર કરાવી શકીએ છીએ.

મુદા નં. (૨) તા ૧૩/૫/૨૦૧૬ની મીટીંગના એજન્ડાની વિગતોના અગત્યના તમામ મુદાઓ (કર વો) જેવા કે, સને ૨૦૧૫-૧૬ના વર્ષનું પુરવણી અંદાજપત્ર અને સને ૨૦૧૬-૧૭ના વર્ષનું અંદાજપત્ર નામજુર થયું તુજરાત રાજ્ય કૃષિ બજાર બોર્ડની લોભ બાબતે કોઈ નિર્ણય ન થાય બેંકમાં લેવડ-દેવડ અને સહીના અધિકાર આપવા બાબતે ચેરમેનશ્રી સુચવેલ કામનું બહુમતિથી પસાર ન થયું કે સરકારશ્રીની લોભ ભરપાઈ કરવા અને કોઈ વિચારણા કે કરાવ બહુમતિથી પસાર ન થાય જેવી અગત્યની બાબતો અને કોઈ નિર્ણય સ ધારણ સભા ની બેઠકમાં બહુમતિથી પસાર નહી થતાં ફિતિ થાય છે કે, બજાર સમિતિ ઉમરાળાની હાલની કમિટીએ બજાર સમિતિના વિકાસ પ્રગતિના કાર્યો માટે કોઈ કાર્યવાહી કરવામાં આવતી નથી.

જવાબ: સરકારશ્રીના લોભ ભરપાઈ કરવા અને કોઈ વિચારણા કે કરાવ બહુમતિથી પસાર ન થાય તે કારણ પણ આપવામાં આવેલ છે પરંતુ નામ સરકારશ્રીની લોભ ભરપાઈ કરવા એટલે કે સરકારશ્રીની વસુલ ત જેવી કામગીરીમાં પણ સરકારશ્રીના પ્રતિનિયુક્ત કર્મચારીઓ બજારો બાબતના નિયમોના નિયમ ૩૫(૭) માં મતદાન કરવા અધિકાર ન થોવાનું સ્પષ્ટ થોવા છતાં મતદાન કરી વિરોધ કરે તે પણ ચોગ્ય બાબત ન હોય તેઓને કપરો આપવાને બદલે ચૂટ.ચેલી બોડીને આવા કારણોસર પદચ્યુત કરવા બજાર ધારાની કલમ ૪૬(૧) મુજબ નોટીસ આપવામાં આવે ત જોગવાઈ વિરુદ્ધ છે. તથા અંદાજ પત્ર મંજૂર ન થવા ઉપરાંત બેંકમાં લેવડ-દેવડ અને સહીના અધિકાર આપવા બાબતે ચેરમેનશ્રી સુચવેલ કામનું બહુમતિથી પસાર ન થવાનું કારણ પણ દર્શાવેલ છે. બેંકમાં સહીના જમુના ચેરમેન, વ્યવસ્થાપક કમિટીના એક સભ્ય અને સેક્રેટરીશ્રી ત્રણ પેક્ટો બેની સહીથી બેંકનો ન હા કીચ વ્યવહાર શરૂ છે. આમ, ચેરમેને સુચવેલ કરાવ બહુમતિથી પસાર ન થવાનું કારણ રહેતું નથી. આથી આપવામાં આવેલ કારણદર્શક નોટીસ રદ કરી ફાઈલે કરવા વિનંતી છે.

અ.મ. ઉપર્યુક્ત વિષયોના પરિપ્રેક્ષ્યમાં બજાર સમિતિને આવેલ કારણદર્શક નોટીસ ના અનુસંધાનમાં બજાર સમિતિ દ્વારા રજુ કરવામાં આવેલ જવાબો તથા રજુઆત ધ્યાને લેતા તુજરાતના ખેતીના ઉત્પન્ન બજારો બ બાબતના નિયમોના નિયમ ૩૫ (૭) હેઠળ સચાલકે નિયુક્ત કરેલ સભ્ય મતદાન કરી શકે નહિ જેથી જે મતદાન ધ્યાને લેવામાં આવે તો બજેટ મંજૂર થયેલ નહાય. આ દલીલ સ્વીકારવા પાત્ર નથી. કારણ કે, નિયામકશ્રી, ખેત બજાર અને ગ્રામ્ય અર્થતંત્ર, ગાદીનગર દ્વારા કલમ-૨૭ હેઠળ જાહેરનામું પ્રસિદ્ધ કરી બને અધિકારીશ્રીઓનો બજાર સમિતિની કમિટીમાં સભ્ય તરીકે સમાવેશ કરેલ છે. જેથી કલમ ૨૩ અને ૨૬ નીચેની સત્તઓ તેમજ ફરજો તેઓએ પણ બજાવવા ની હોય છે તેમજ મતદાન કરવાનો પણ અધિકાર ધર વે છે.

ઉક્ત વિગતો ધ્યાને લેતા પુખ્ત વિચારણાના અંતે જવાબ ગ્રાહ્ય રાખવા પાત્ર નથી, કારણ કે ઉપર જણાવ્યું તેમ બને મુદાઓ બાબતે હાલની બજાર સમિતિ ઉમરાળાના હાલના ચેરમેનશ્રી તથા વાઇસ ચેરમેનશ્રી હાલની કમિટીનો વિશ્વાસ ધરાવતાં નથી તેથી બજાર સમિતિ

ઉમરાળાના હિસાબી તથા વહીવટી કામગીરી કે, બજાર સમિતિના પ્રતિભા કોઈ કાર્ય ન થાય તેવી દહેશત ઉભી થયેલ છે.

આથી હાલની ચૂંટાયેલ કમિટી ફાયદાથી સંપન્નતામાં આવેલ ફરજો બજાવી શકે તેમ ન હોય ખેતીવાડી ઉત્પાદન બજાર સમિતિ-ઉમરાળાનો વિકાસ રૂઢાંચ નહીં તેવા સંજોગોમાં ગુજરાત ખેત ઉત્પાદન બજાર અધિનિયમ ૧૯૬૩ ની કલમ ૪૬ હેઠળ બજાર સમિતિ ઉમરાળાને પદચ્યુત કરવા નિયતમુદ્દી, ખેત બજાર અને ગ્રામ્ય અર્થતંત્ર મંત્રીનગરે કરેલ ભલામણને ધ્યાનમાં લઈ નીચે મુજબનો હુકમ કરવામાં આવે છે.

હુકમ:-

આથી ગુજરાત ખેત ઉત્પાદન બજાર અધિનિયમ-૧૯૬૩ ની કલમ-૪૬ (૧) થી મળેલ સત્તાની રૂએ ખેતીવાડી ઉત્પાદન બજાર સમિતિ-ઉમરાળાની વ્યવસ્થાપક કમિટીને આપવામાં આવેલ તા ૧૩/૭/૨૦૧૬ની નોટીસ સદર્ભ રજુ થયેલ જવાબ / સ્પષ્ટતા ગ્રાહ્ય રાખવામાં આવતી નથી અને સદરજુ અધિનિયમની કલમ-૪૬ હેઠળ મળેલ સત્તાની રૂએ ખેતીવાડી ઉત્પાદન બજાર સમિતિ-ઉમરાળાના વ્યવસ્થાપક કમિટીને આથી પદચ્યુત કરવામાં આવે છે અને ખેતીવાડી ઉત્પાદન બજાર સમિતિ-ઉમરાળાના વહીવટ માટે નાયબ નિયામક અને જિલ્લા રજીસ્ટ્રાર શ્રી સહકારી મંડળીઓ ભાવનગરની વહીવટદાર તરીકે નિમણૂક કરવામાં આવે છે.

 (b) The Returning Officer shall examine the nomination papers and decide objections, if any, which may be made by any person in respect of any nomination and may either on such objection or on his own motion and after such summary inquiry, if any, as the Returning Officer thinks necessary, reject any nomination.

Provided that the nomination of a candidate shall not be rejected merely on the ground of an incorrect description of his name or the name of his proposer or seconder or any other particulars relating to the candidate or his proposer or seconder as entered in the list of street vendors referred to in clause (v) above, if the identity of the candidate, the proposer or seconder, as the case may be, is established beyond reasonable doubt,

- (c) the Returning Officer shall give all reasonable facilities to the contesting candidates or, the proposer or seconder, as the case may be, to examine all the nomination papers and to satisfy themselves that the inclusion of the name of the contesting candidate is valid,
- (d) the Returning Officer shall endorse on each nomination paper his decision accepting or rejecting the same and if the nomination paper is rejected, he shall record in writing a brief statement of his reasons for such rejection,
- (e) the returning officer shall not allow any adjournment of the proceedings except when such proceedings are interrupted or obstructed by riots or affray or by reasons beyond his control.
- (x) The list of valid nominations as decided by the returning officer with names in English alphabetical order and addresses of the candidates as given in the nomination papers shall be displayed or published on the same day on which the scrutiny of the nomination papers is completed.

- (xi) Any candidate may withdraw his candidature by giving notice in writing signed by him and submitted in person, at any time after the presentation of his nomination paper but before 05.00 p.m. on the day following the day on which the valid nominations are published, to the Returning Officer. A notice of withdrawal of candidature once given shall be irrevocable.
- (xii) Where the number of candidates whose nomination papers have been declared valid, does not exceed the number of candidates to be elected, the Returning Officer shall declare those candidates to have been duly elected to the Town Vending Committee after the closing hour of the day of withdrawal of candidatures fixed under clause (x) above. Where the number of candidates whose nominations are valid exceeds the number to be elected, the Returning Officer shall arrange for conducting the poll on the date fixed for the purpose. The Returning Officer may appoint one or more polling officers as may be necessary for conducting the poll. The ballot paper to be used for the election shall be in Form-II.
- (xiii) The Local Authority shall provide to the Returning Officer with ballot boxes, ballot papers, copy of list of street vendors or voters and such other articles as may be necessary for the conduct of election. The ballot box shall be designed in such a way that ballot papers can be inserted therein but cannot be taken out therefrom without the boxes being unlocked. A candidate contesting the election may, by a letter to the Returning Officer, appoint an agent to represent him for both the places where polling is held to identify the voters and to watch the recording of votes. Such letter shall contain the consent in writing of the agent concerned in Form-III.
- (xiv) The canvassing for votes by any person at the place where election is to be conducted shall be prohibited.
- (xv) Immediately before the commencement of the poll, the Returning Officer shall show the empty ballot box to such persons as may be present at the time and shall then lock it up and fix his seal. The candidate or his agent may also affix his own seal, if he so desires.
- (xvi) Every street vendor or voter who desires to exercise his right to vote shall be supplied with a ballot paper containing the names of contesting candidates arranged in the English Alphabetical order either printed, typed written or cyclostyied, according to convenience, on the ballot paper. The ballot paper shall also bear the seal of the Town Vending Committee and also the initials of the Returning Officer and further contained a column, for the voter to inscribe a mark (x) against the names of persons to whom he wants to vote.
- (xvii) Each polling station and where there is more than one polling booth at a station, each such booth shall contain a separate compartment in which the street vendor or voters can record their votes in secrecy.
- (xviii) No ballot paper shall be issued to a street vendor or voter unless the polling officer is satisfied that the street vendor or voter concerned is the same person as noted in the list furnished to him. On receipt of such ballot paper, the street vendor or voter shall proceed to the polling compartment set apart for the purpose and indicate the person or persons in whose favour he exercises his vote by inscribing a mark (x) against the name or names of the candidate or candidates, as the case may be, and drop the ballot paper in the ballot box kept for the purpose with utmost secrecy. If owing to blindness or other physical infirmity or

illiteracy the street vendor or voter is unable to inscribe the mark on the ballot paper the polling officer and where no such polling officer is appointed the Returning Officer shall ascertain from him the candidate or candidates in whose favour he desired to vote inscribe the mark (x) on his behalf and drop the ballot paper in the ballot box.

- (xix) If, at any stage of the polling, the proceedings are interrupted or obstructed by any riot or affray or if at such elections, it is not possible to take the poll for any sufficient cause, the Returning Officer may stop the polling, recording his reasons for such action in the minute book of the Town Vending Committee.
- (xx) No street vendor or voter shall be admitted after the hours fixed for the poll, but a voter who enters the premises where ballot papers are being issued before the close of the polling hour shall be issued the ballot paper and allowed him to cast his vote.
- (xxi) The counting of votes shall take place immediately after the closure of the poll. If this is not possible, the ballot box shall be sealed with the seal of the Returning Officer and the contesting candidates or the agents, if they so desire, deposit such ballot box with the local authority for custody. The Returning Officer shall then announce the next day of counting. The votes shall be counted by or under the supervision of the Returning Officer. Each candidate and his authorised agent shall have a right to be present at the time of counting. But absence of any candidate or his agent at the time of counting shall not vitiate the counting and the announcement of results by the Returning Officer. The number of votes secured by each candidate and the result of the election shall be announced by the Returning Officer as soon as the counting is over.
- (xxii) The result of the election shall also be recorded in the minute book of the Town Vending Committee and attested by the Returning Officer and shall also be notified immediately on the notice board of the Town Vending Committee.
- (xxiii) In case of equal number of votes the Returning Officer shall declare the election result by tossing coin.
- (xxiv) The ballot paper shall be rejected by the Returning Officer if—
- (i) it bears any mark by which the street vendor's vote can be identified,
 - (ii) it does not bear the seal of the Town Vending Committee or the initials of the Returning Officer,
 - (iii) the mark indicating the vote thereon is placed in such a manner as to make it doubtful to which candidate the vote has been casted, and
 - (iv) is so damaged or mutilated that its identity as a genuine ballot paper cannot be established.
- (xxv) After the result of election has been announced, the result of the election and a report thereon shall be communicated to the local authority as well as to the State Government by the Returning Officer within three days from the date of declaration of the result.
- (xxvi) After the declaration of the result of the election, the Returning Officer shall handover the ballot paper and records relating to the elections of the members of the Town Vending Committee to the local authority in a sealed cover. The aforesaid record shall safely be preserved by the local authority for a period of six months from the date of election or till such time a dispute regarding election, if any, filed is disposed of whichever is later and shall thereafter be destroyed by the local authority. A copy of the handing over and taking over record of election shall be sent to the State Government as well as to the local authority by the Returning Officer along with his report.

9. The Taxation Authority shall transfer the vehicle in the name of purchaser at the time of delivery of Motor Vehicle, if motor vehicle is road worthy condition.

10. All the applicant's taxes, duties or any other tax payable after the date of taking delivery, the purchaser shall be responsible to a legal liability to be determined after taking up the possession by himself.

11. Where the amount paid by successful purchaser is more than tax, penalty, interest, the Taxation Authority may give opportunity to the registered owner or person in possession of vehicle of the vehicle by Registrar, P. S. A. to receive such excess amount.

Provided, that where such excess amount is not claimed within 7 days from the date of receipt of notification, it shall be deposited in the Public Revenue Fund and no person shall have any right over that amount.

Provided, further, that where such excess amount is not claimed by the registered owner or lease agreement with the owner and after auction it appears that the amount paid by successful purchaser is more than the amount due to the Government, the Taxation Authority may give the amount of such excess amount to the registered owner or lease agreement with the owner. The Motor Vehicle Tax Act, 1958, shall apply to the amount of such excess amount and the registered owner or lease agreement shall be responsible for the payment of such excess amount. The Taxation Authority shall, upon receipt of such amount, forward the same to the Registrar, P. S. A. to receive such amount and no person shall have any right over that amount.

Provided, also, that the Taxation Authority may give opportunity of being heard to the registered owner or person in possession of vehicle before cancelling such amount to the Government.

12. Where no person shall come forward to take part in second auction, the Taxation Authority shall send a report to the Commissioner of Transport and who may take appropriate decision for the disposal of vehicle by any other manner as he may deem fit.

13. Where before or during the process of the auction, the Taxation Authority has reason to believe that the participants of auction are acting in making cartel or syndicate or in any other manner at the expense of public interest, the Taxation Authority shall be empowered to cancel the auction at any stage without giving any reason. An order of cancellation of the auction shall be published in the name board of the office. The Taxation Authority shall intimate to the Commissioner of Transport regarding the cancellation and bid received, if any, shall be returned to the applicants after cancellation of auction.

14. Where after auction it appears that the outstanding tax, penalty and interest are not recovered fully, the Taxation Authority shall have a right to recover such amount in accordance with the provisions of the Gujarat Motor Vehicles Tax Act, 1958.

15. The Taxation Authority shall have right to cancel the auction at any stage without giving any reason.

By order and in the name of the Governor of Gujarat,

PRAKASH MAJUMDAR,
Deputy Secretary to Government.

1) The first step in the process of identifying a problem is to determine the nature of the problem. This involves a thorough understanding of the situation and the factors that are contributing to the problem. Once the nature of the problem is understood, the next step is to identify the causes of the problem. This involves a detailed analysis of the situation and the factors that are contributing to the problem. Once the causes of the problem are identified, the next step is to develop a plan of action. This involves determining the steps that need to be taken to solve the problem. Once a plan of action is developed, the next step is to implement the plan. This involves carrying out the steps that have been identified in the plan of action. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in solving the problem and whether any further action is needed.

SCHEDULE

(See rule 6)

Manner of Election of the Members of the Town Vending Committee from amongst the Street Vendors.

(1) The local authority shall, by a notification, express its intention to conduct the election for the members of the Town Vending Committee representing the street vendors of the area under its jurisdiction.

(2) The local authority shall appoint a Member secretary of the Town Vending Committee as Returning Officer for the purpose of conducting the election of the members of the Town Vending Committee representing the street vendors of the area under its jurisdiction.

(3) The Returning Officer appointed under clause (2) shall conduct the election for the members of the Town Vending Committee in accordance with the provisions in the manner provided hereinafter.

(4) A member of the stationary vendor or street vendor shall be disqualified to be elected as a member of the Town Vending Committee if he is convicted of an offence involving moral turpitude or he is physically or mentally incapable of discharging duties as a member of a Town Vending Committee.

(5) The local authority shall supervise, direct and control the conduct of elections of the members of the Town Vending Committee representing the street vendors in the area of its jurisdiction.

(i) As soon as the notification referred to in clause (1) has been issued and a Returning Officer is appointed under clause (2) the local authority shall by a resolution determine the date, time and place for conduct of the election.

(v) The notice of the resolution or decision of the local authority shall be circulated among the street vendors engaged in the vocation of street vending in the area of jurisdiction of the Town Vending Committee by any of the following modes, namely:

- (a) by public notice to be published in two prominent daily newspapers out of which one shall be in the local language of the area;
- (b) by local delivery;
- (c) by post under certificate of posting;
- (d) by speed post or courier services duly registered with the competent authority as well as on the notice board of the returning officer. The notice shall contain information regarding -
 - (i) the number of members to be elected including seats reserved for representation of the Scheduled Castes, Scheduled Tribes, Other Backward Classes, Women, Persons with Disabilities, Minorities or any other specified categories;
 - (ii) the date on which the place at which and the hours between which nomination papers shall be filed, such date being not less than seven clear days before the date fixed for election or if that day happens to be public holiday the next succeeding day which is not a public holiday;
 - (iii) the date and the hour for scrutiny of the nomination papers; and
 - (iv) the date, place and the hours of the polling.

(vi) The local authority shall prepare a list of street vendors engaged in the vocation of street vending in the area of jurisdiction of the Town Vending Committee as it stood on thirty days before the date fixed for inviting the nominations and publish copies of the said list by affixing them upon the notice board at the office of the Town Vending Committee not less than ten days prior to the date fixed for inviting nominations. The list shall specify the registration number, certificate of vending and the name of the street vendor, the name of owner or husband, as the case may be and the address of the street vendor, shall be the duty of the Town Vending Committee or the local authority as the case may be to bring up-to-date register of street vendors and such other registers as the Returning Officer may require and hand over such records or register to the Returning Officer thirty days prior to the date fixed for the purpose of the election. A copy of the list shall be supplied by the Town Vending Committee or the local authority or Returning Officer as the case may be to any street vendor on payment of such fees as determined by the local authority.

(vii) The nominations of the candidates for election shall be made in form which shall be provided by the Returning Officer to any street vendor free of cost.

(viii) The candidate shall make a security deposit of rupees two thousand in cash or bank draft or pay order along with the nomination papers. If a candidate fails to get less than one sixth of the votes polled the security deposit shall be forfeited to the local authority.

(ix) Every nomination paper shall be presented in person by the candidate himself or by his proposer or seconder to the Returning Officer. The Returning Officer shall enter on the nomination paper its serial number and certify the date and hour at which the nomination is received by him and shall immediately give a written acknowledgement of receiving the

nomination paper which shall bear the seal of the Town Voting Committee or Returning Officer, any nomination paper which is not received prior to the date and time fixed for its receipt shall be rejected.

(x) On the day following the date fixed for the receipt of nomination papers, the Returning Officer shall take up the scrutiny of the nomination papers.

(i) The Returning Officer shall examine the nomination papers and decide on objections, any which may be made by any person in connection with any nomination and may order or suspend the election or any part thereof and alter the date, time and place of any election as the Returning Officer thinks necessary, reject any nomination.

Provided that the nomination of a candidate shall not be rejected merely on the ground of an incorrect description of the name or the name of his proposer or secondor or any other particulars relating to the candidate or his proposer or secondor as entered in the list of street vendors received in accordance with above, the identity of the candidate, the proposer or secondor as the case may be established beyond reasonable doubt;

(ii) the Returning Officer shall give all reasonable facilities to the proposer, secondor or the proposer or secondor as the case may be to examine the nomination papers and to satisfy themselves that the inclusion of the name of the contesting candidate is valid.

(iii) the Returning Officer shall endorse on each nomination paper his decision, accepting or rejecting the same and if the nomination is rejected, he shall record in writing a brief statement of his reasons for such rejection.

(iv) the returning officer shall not allow any adjournment of the proceedings except when such proceedings are interrupted or obstructed by riot or disorder or by reasons beyond his control.

(xi) The list of valid nominations as decided by the returning officer with names, nicknames, address, call number and addresses of the candidates as given in the nomination papers shall be displayed or published in the place where within the scrutiny of the nomination papers is completed.

(xii) Any candidate may withdraw his candidature by writing notice in writing signed by him and submitted in person or by agent before the publication of his name in the list of candidates, on the day following the day when the nomination papers are taken to the Returning Officer. A notice of withdrawal of candidature once given shall be irrevocable.

(xiii) Where the number of candidates who have been declared valid is not equal to the number of seats to be elected, the Returning Officer shall declare those candidates to have been duly elected who the Town Voting Committee after the closing of the election day of voting have elected and the number of seats to be elected the Returning Officer shall declare by ballot paper to be used for the purpose. The Returning Officer may appoint one or more polling stations as may be necessary for conducting the poll. The ballot paper to be used in the election shall be in Form I.

(xiv) The Local Authority shall provide to the Returning Officer with ballot boxes, ballot papers, copy of the street vendors or voters and such materials as may be necessary for the conduct of election. The ballot box shall be designed such that the ballot paper can be inserted therein but cannot be taken out thereof without the box being unlocked. A candidate contesting the election may be a voter to the election or may appoint a voter in

represent him for both the places where polling is held to identify the voters and to watch the recording of votes. Such letter shall contain the consent in writing of the agent concerned in Form-III.

(xiv) The canvassing for votes by any person at the place where elections to be conducted shall be prohibited.

(xv) Immediately before the commencement of the poll the Returning Officer shall show the empty ballot box to such persons as may be present at the time and shall then lock it up and fix his seal. The candidate or his agent may also affix his own seal if he so desires.

(xvi) Every street vendor or voter who desires to exercise his right to vote shall be supplied with a ballot paper containing the names of contesting candidates arranged in the English Alphabetical order either printed, typed, written or cyclostyled according to convenience on the ballot paper. The ballot paper shall also bear the seal of the Town Vending Committee and a signature of the Returning Officer and further contain a column, for the voter to inscribe a mark (x) against the names of persons to whom he wants to vote.

(xvii) Each polling station and where there is more than one polling booth at a station each such booth shall contain a separate compartment in which the street vendor or voters can record their votes in secrecy.

(xviii) No ballot paper shall be issued to a street vendor or voter unless the polling officer is satisfied that the street vendor or voter concerned is the same person as named in the list furnished to him. On receipt of such ballot paper the street vendor or voter shall proceed to the polling compartment set apart for the purpose and indicate the person or persons in whose favour he exercises his vote by inscribing a mark (x) against the name or names of the candidate or candidates. If the case may be, he may drop the ballot paper in the ballot box kept for the purpose with utmost secrecy. If owing to blindness or other physical infirmity or illiteracy the street vendor or voter is unable to inscribe the mark on the ballot paper the polling officer or, where no such polling officer is appointed, the Returning Officer shall ascertain from him the candidate or candidates in whose favour he desired to vote, inscribe the mark (x) on his behalf and drop the ballot paper in the ballot box.

(xix) If at any stage of the polling, the proceedings are interrupted or obstructed by any riot or affray or if at such elections it is not possible to take the poll on any sufficient cause the Returning Officer may stop the polling, recording his reasons for such action in the minute book of the Town Vending Committee.

(xx) No street vendor or voter shall be admitted after the hours fixed for the poll but a voter who enters the premises where ballot papers are being issued before the close of the polling hour shall be issued the ballot paper and allowed to cast his vote.

(xxi) The counting of votes shall take place immediately after the closure of the premises is not possible. The count box shall be sealed with the seal of the Returning Officer and the contesting candidates or their agents, may so desire deposit such a box with the local authority for custody. The Returning Officer shall then announce the next day of counting. The votes shall be counted by or under the supervision of the Returning Officer. Each candidate and his authorized agent shall have a right to be present at the time of counting. But absence of any candidate or his agent at the time of counting shall not vitiate the counting and the announcement of results by the Returning Officer. The number of votes secured by each candidate and the result of the election shall be announced by the Returning Officer as soon as the counting is over.
